Ambient Intelligence - Software and Applications Ad van Berlo, Kasper Hallenborg, Juan M. Corchado Rodríguez, Dante I. Tapia, Paulo Novais, 2013-04-22

Ambient Intelligence (AmI) is a recent paradigm emerging from Artificial Intelligence (AI) where computers are used as proactive tools assisting people with their day to day activities making everyone's life more comfortable. Another main concern of AmI originates from the human computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means of user friendly interfaces. This field is evolving quickly as can be witnessed by the emerging natural language and gesture based types of interaction. The inclusion of computational power and communication technologies in everyday objects is growing and their embedding into our environments should be as invisible as possible. In order for AmI to be successful human interaction with computing power and embedded systems in the surroundings should be smooth and happen without people actually noticing it. The only awareness people should have arises from AmI more safety, comfort and wellbeing emerging in a natural and inherent way.

ISAmI is the International Symposium on Ambient Intelligence and aims to bring together researchers from various disciplines that constitute the scientific field of Ambient Intelligence to present and discuss the latest results, new ideas, projects and lessons learned, namely in terms of software and applications, and aims to bring together researchers from various disciplines that are interested in all aspects of this area.

Android: The World's Most Popular Mobile OS Jack Westerfil, 2012-07-30 ABOUT THE BOOK Android is now the world's most popular mobile operating system That wasn't always the case however When the platform first came out it was ill equipped to combat the threat of the iPhone Growing from a humble beginning Android's popularity around the world has exploded According to Google Android sees 350 000 devices activated every single day the platform also accounts for nearly 60% of all first time smartphone purchases and holds 47% of the entire market But that statistic is a bit out of date Andy Rubin head honcho on the Android project claims that Android sees 700 000 activations daily with over 250 million Android devices in use around the world That's an incredible statistic The amazing thing is that Android's growth doesn't seem to be abating If anything Android is growing faster than ever Google has managed to halt the unstoppable behemoth that is Apple a company that demolished every established player in the field Now Android and iOS have split the playing field Android has thrived in a world that has seen Microsoft Blackberry Palm and Nokia fail And RIM is on the verge of defeat after managing to hold on thanks to its incredible BBM system Android has proven to be the only viable threat to Apple and Apple the only threat to Google It's no wonder that the two are locked in constant legal battles Now Android is entering a new era Google is pushing Android as a generic solution to any platform that needs a lightweight operating system positioning it to replace low end Linux devices We have seen Android put into cars into televisions and even into refrigerators But perhaps the most interesting use of Android comes from Google itself who is using the platform in its Project Glass Project Glass is one of the most ambitious initiatives of this decade an attempt to truly implement a wearable computing system We still know very little about the project but it could prove to be as disruptive as the original iPhone was In fact it might prove to be even more disruptive if Google gets the implements it properly Purpose This is an ebook about Android where it came from and why it has risen to a position of prominence among smartphone operating systems I'll look at the history of the platform from its first tentative steps to the modern day where Android devices are constantly on the cutting edge of technology I'll cover the implications of a world dominated by a freely

distributed platform and delve into the issues raised by it There is much to cover but I will try my best to be brief Who am I and why am I qualified to write this I am a technology blogger I have followed Android s ascent to the throne seen its occasional missteps and heard all the criticisms I have used custom roms run alternate launchers and have replaced my homescreen I love Android for its customizability and its flexibility both of which are unmatched on any other platform I have run into the platform s limits and tried to push past them I have even developed for the platform So stick with me as we take this journey into the heart and mind of a platform that rejuvenated the open source movement EXCERPT FROM THE BOOK Then came Maps Navigation a completely free alternative that shipped with the phone GPS manufacturers were terrified by Google Maps Navigation and for good reason This was the beginning of the end for the industry and other industries began to wonder when Google was going to destroy them too Google Maps Navigation had many features that only came on the most advanced GPS devices of the time It featured a slick 3D view complete with the ability to layer satellite photography on top voice guidance including street names something that many other devices could only dream of and live traffic information
