Marran, 1999-10 National Missile Defence and the politics of US identity Natalie Bormann, 2013-07-19 Why adopt a poststructural lens for the reading of the military strategy of national missile defence NMD No doubt when contemplating an attack on US territory by intercontinental ballistic missiles consulting Michel Foucault and critical international relations theory scholars may not seem the obvious route to take The answer to this lies in another question why has there been so much interest and continuous investment in NMD deployment when there is such ambiguity surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost Posed in this manner the question cannot be answered on its own terms the terms given in official accounts of NMD that justify the system's significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios Instead this book argues that the preferences leading to NMD deployment must be understood as satisfying requirements beyond strategic approaches and issues In turning towards the interpretative modes of inquiry provided by critical social theory and poststructuralism this book contests the conventional wisdom about

NMD and suggests reading the strategy in terms of US identity Presented as an analysis of discourses on threats to national security around which the need for NMD deployment is predominantly framed this book is an effort to let the two fields of critical international relations theory and US foreign policy speak directly to each other It seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice *The SAGE Handbook of Political Geography* Kevin R Cox, Murray Low, Jennifer Robinson, 2007-12-18 A thorough and absorbing tour of the sub discipline An essential acquisition for any scholar or teacher interested in geographical perspectives on political process Sallie Marston University of Arizona This unique book is a true encyclopedia of political geography Vladimir Kolossov Institute of Geography of the Russian Academy of Sciences and Vice President of the IGU The SAGE Handbook of Political Geography provides a highly contextualised and systematic overview of the latest thinking and research in the field Edited by key scholars with international contributions from acknowledged authorities on the relevant research the Handbook is divided into six sections Scope and Development of Political Geography the geography of knowledge conceptualisations of power and scale Geographies of the State state theory territory and central local relations legal geographies borders Participation and representation citizenship electoral geography media public space and social movements Political Geographies of Difference class nationalism gender sexuality and culture Geography Policy and Governance regulation welfare urban space and planning Global Political Geographies imperialism post colonialism globalization environmental politics IR war and migration The SAGE Handbook of Political Geography is essential reading for upper level students and scholars with an interest in politics and space **Encyclopedia of Information Science and Technology, Second Edition** Khosrow-Pour, D.B.A., Mehdi, 2008-10-31 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher **Handbook of Artificial Intelligence in Education** Benedict du Boulay, Antonija Mitrovic, Kalina Yacef, 2023-01-20 Gathering insightful and stimulating contributions from leading global experts in Artificial Intelligence in Education AIED this comprehensive Handbook traces the development of AIED from its early foundations in the 1970s to the present day **Handbook of Rural Development** Gary Paul Green, 2013-12-27 Rural development policies have historically focused primarily on increasing agricultural productivity but this volume demonstrates the need for a much broader approach as rural producers become increasingly integrated into the global economy Followi The Tourism Area Life Cycle: Conceptual and theoretical issues Richard Butler, 2006 This book is divided into five sections the conceptual origins of the TALC spatial relationships and the TALC alternative conceptual approaches renewing or retiring with the TALC and predicting with the TALC It concludes with a review of the future potential of the model in the area of the destination development process
