

ECC Exam 1 Study Guide

1. 3 domains of development

- **Physical** (weight, motor skills, reproductive...)
- **Cognitive** (intellectual, e.g., attention, memory, language, problem solving)
- **Social & Emotional** (Often in combination with another domain, e.g., a cognitive language delay may cause a strain on the social and emotional domain)

2. 5 themes

- 1. How do **nature AND nurture** interact to affect development?
 - Nature is genetic characteristics
 - Nurture is environmental (e.g., parents, religion, area of living, school size, ...)
 - Findings are important for parents and teachers because they create the environment, and policy makers because they can create programs and determine if our tax dollars cover it (e.g., head start program)
 - **Epigenetics**: experience affects gene expression; study of how environment impacts the expression of genes (e.g., chaotic family environment may draw out mental illness)
- 2. How do children **shape their own development**?
 - Child's traits/characteristics
 - Child-initiated activities/preferences
 - Choice of friends, environments, and activities
- 3. How does the **social and cultural environment** affect one's **psychological** development?
 - *this is different from #1 because there is no mention or tie to genetics
 - Single parent home? Poverty? Ethnic backgrounds and customs?
- 4. Is development **continuous**? (resulting from small, gradual, steady, quantitative advances?) Or is it **discontinuous**? (resulting from abrupt, dramatic reorganizations of some qualitative change)
 - Only applies to cognitive domain because it is growing and changing linearly
 - Research shows development is continuous and able to be quantified
 - Discontinuous would be development in stages (think Piaget, or a caterpillar abruptly metamorphosing into a butterfly)
- 5. **Individual differences** in human development
 - There is no "normal" age for a child to do something for the first time
 - Environment may play a role
 - Long-term effects?
 - Walking? None
 - Toilet-training? None
 - Reading? Yes. Typically learned K-1

3. What makes the measurement of a variable **valid and reliable**?

- **Valid**: if the tool or test measures what it is supposed to measure (e.g., sociograms are a valid way to measure popularity)

Human Development Study Guides

Guillaume Favre

Human Development Study Guides:

Immerse yourself in heartwarming tales of love and emotion with its touching creation, Experience Love's Journey in **Human Development Study Guides** . This emotionally charged ebook, available for download in a PDF format (Download in PDF: *), is a celebration of love in all its forms.
