EXEMPLAR ANSWERS

Specimen Paper 2 2015

Last week I went on a trip down memory lane to investigate a longstanding mystery. The Beast of Bodmin Moor has frightened the locals of the region for many years. Many locals believe it has destroyed their livestock. It does not resemble any local animal, such as a boar, dog or pony and local tracks that have been found have been identified as that of a puma. Farmers claim that the way the animal kills its prey is definitely like that of a wild cat; direct, no mess, quick and efficient, not messy like a dog. Video evidence and audio recordings of the night calls of a puma support the case this beast stalks the moor.

My link to this legend goes back to my childhood when I grew up in this region. I remember tales of the vicious wild cat that preyed upon local animals; a government investigation found no evidence of the wild predator. However, my own experience was to counteract this. As I drove down a narrow lane I was confronted by something extraordinary. A black shape, like a wild cat moved in front of my car. Its large eyes studied me. It was well built and moved quickly, yet smoothly, just like a feline predator. Then it disappeared as quickly as it appeared.

Bodmin Moor has always had an eerie feel to it. Locals have always believed in the wild cat theory of the beast. I do have a feeling they are right supported by the various sightings over a long period; some believe that it is a wild cat escaped from a local zoo. However, I do have to question my own sighting. The light was poor, so I couldn't see everything clearly. I could have been mistaken in what I saw. I could have imagined it, as I had been thinking about nothing else but the beast on my journey. An official investigation will help the situation by clearing up the mystery once and for all.
