Thomas Trzyna,2018-05-31 Democracy requires a commitment to dialogue and deliberation as well as a commitment to seek

peaceful solutions Is democracy possible in states that earn significant portions of their revenue from the manufacture and sales of arms that give weapons away in huge numbers and that turn quickly to violence in the face of difficulties The proliferation of weapons is nearly as great a tragedy of the commons as global warming and the evidence indicates that civilians are increasingly being targeted in wars How large is the problem of war today Given that the members of the UN Security Council are among the chief manufacturers of weapons are there any useful mechanisms in place for limiting wars or the supply of deadly weapons Is it time in view of the callousness with which non combatants are killed to re examine our basic reasons for valuing human life Cain s Crime re introduces an ethical theory popular at the dawn of the twentieth century and examines the extent of violence in the contemporary world from neo colonial wars civil wars freedom movements and ethnic conflicts to the oldest war of all the systematic and continuing murder of women in cultures where they are valued less than men

**Non-Linear Perspectives on Teacher Development** Kathryn J. Strom, Tammy Mills, Linda Abrams, 2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal Professional Development in Education
