The Journal of Health and Physical Education ,1932 **Medical Journal of Australia** ,1914 *Evaluation of Continuing Education in the Health Professions* Stephen Abrahamson,2012-12-06 Phil R Manning Can you prove that continuing education really makes any difference Over the years educators concerned with continuing education CE for health professionals have either heard or voiced that question in one form or another more than once But because of the difficulty in measuring the specific effects of a given course program or conference the question has not been answered satisfactorily Since CE is costly since CE is now mandated in some states for re registration and since its worth has not been proven in formal evaluation research the pressure to evaluate remains strong The question can be partially answered by a more careful definition of continuing education particularly the goals to be achieved by CEo Another part of the answer depends on the development of a stronger commitment to evaluation of CE by its providers But a significant part of the answer might be provided through the improvement of methods used in evaluation of continuing education for health professionals To address this last concern the Development and Demonstration Center in Continuing Education for the Health Professions of the University of Southern California organized and conducted a meeting of academicians and practitioners in evaluation of continuing education During a three day period participants heard formal presentations by five invited speakers and then discussed the application of the state of the art of educational evaluation to problems of evaluation of continuing education for health professionals
