Constitutional Resilience in South Asia

Swati Jhaveri,Tarunabh Khaitan,Dinesha Samararatne,2023-06-01 South Asia has had a tumultuous and varied experience with constitutional democracy that predates the recent rise in populism and its study in established democracies And yet this region has remained largely ignored by constitutional studies and democracy scholars This book addresses this gap and presents a contribution to the South Asia centric literature on the topic of the stability and resilience of constitutional democracies Chapters deal not only with relatively well known South Asian countries such as India Bangladesh Pakistan and Sri Lanka but also with countries often ignored by scholars such as Bhutan Nepal Maldives and Afghanistan The contributions consider the design and functioning of an array of institutions and actors including political parties legislatures the political executive the bureaucracy courts fourth branch guarantor institutions such as electoral commissions the people and the military to examine their roles in strengthening or undermining constitutional democracy across South Asia Each chapter offers a contextual and jurisdictionally tethered account of the causes behind the erosion of constitutional democracy and some examine the resilience of constitutional institutions against democratic erosion

A Physiologically-Based

Approach to Study Different Types of Locomotion in Association with Core Performance Erika Zemková,Magni Mohr,Dario Novak ,Tomas Maly,2024-11-11 Good posture and strong core muscles are essential for most athletic movements but also for everyday activities Among them walking and running require lumbo pelvic stability and mobility for efficient movement and high level performace This is especially important during a large range of trunk motions when changing the direction of movement an abrupt walk to run transition or extreme uphill and downhill walking or running Such repetitive trunk loading over time can contribute to occurence of back problems and lower limb injuries To avoid these unwanted effects a novel approach to studying the physiology of locomotion in relation to spine motion and balance function is required This can provide a basis for designing exercise programs specifically tailored for competitive athletes the healthy general population as well as those suffering from movement disorders So far much effort has been devoted to investigating the biomechanical and physiological variations of locomotion including walking running swimming or hopping However a surprising gap in the evidence is to what extent core strength contributes to effective locomotor performance and a healthy back Studying the neurophysiological mechanisms underlying the control of postural and core stability with special reference to locomotion is therefore of great importance
