MARK SCHEME for the May/June 2013 series

0455 ECONOMICS

0455/21

Paper 2 (Structured Questions), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

political issues are thought about and addressed The result is that the majority of citizens who cannot speak this language are locked out of politics while political decisions are increasingly devolved to experts The econocracy explains how economics came to be seen this way and the damaging consequences It opens up the discipline and demonstrates its inner workings to the wider public so that the task of reclaiming democracy can begin *The Political Economy of Electricity* Mark Cooper, 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today's electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach 2024-25 TGT/PGT Economics Solved Papers YCT Expert Team , 2024 25 TGT PGT Economics Solved Papers The People's Money Paola Subacchi, 2016-11-22 Many of the world's major economies boast dominant international currencies Not so for China Its renminbi has lagged far behind the pound the euro and the dollar in global circulation and for good reason China has long privileged economic policies that have fueled development at the expense of the renminbi's growth and it has become clear that the underpowered currency is threatening China's future The nation's leaders now face the daunting task of strengthening the currency without losing control of the nation's economy or risking total collapse How are they approaching this challenge In *The People's Money* Paola Subacchi introduces readers to China's monetary system mapping its evolution over the past century and particularly its transformation since Deng Xiaoping took power in 1978 Subacchi revisits the policies that fostered the country's economic rise while at the same time purposefully creating a currency of little use beyond China's borders She shows the key to understanding China's economic predicament lies in past and future strategies for the renminbi The financial turbulence

following the global crisis of 2008 coupled with China's ambitions as a global creditor and chief economic power has forced the nation to reckon with the limited international circulation of the renminbi. Increasing the currency's reach will play a major role in securing China's future. **Economics 101 for Senators and Representatives** Wallace Hoffman, 2022-08-24. The mission of this book is to inform all American citizens how their senators and representatives vote in Washington. Do your senators and your representative fulfill the responsibilities of government in the Constitution and vote in your favor? If that is true, they are your friends. Or do your senators and your representatives violate the Constitution and vote against your best interest? If that is true, they are your enemies. If you vote for and reelect your enemies, they will be your enemies the next two or six years. President Obama's legacy of deficit spending is characterized by average deficit spending of more than a trillion dollars annually. During those eight years, every American household went to bed each evening fifty dollars deeper in debt, regardless of how hard they worked or whether they spent any money. The national debt more than doubled during President Obama's eight years in office. Each person's share of debt increased from 30,000 to 70,000. **Oswaal CBSE Question**

Hufbauer, Barbara Kotschwar, 2014-05-05. Description: For more than 50 years, the United States has attempted to destabilize and isolate the Castro regime in Cuba with the use of trade and financial sanctions, a policy that has fallen short of its objective. In this Policy Analysis, Gary Clyde Hufbauer and Barbara Kotschwar suggest that the sands of time may accomplish what economic pressure did not. Raúl Castro, president of Cuba since 2008, plans to step down at the end of 2018, implying a new regime in five years. Various forces are starting to emerge favoring economic normalization if Cuba appears ready to change its policies as well as its leadership. The authors caution, however, that a unilateral dismantling of US sanctions without insuring that proper institutions are in place in Cuba could squander a golden opportunity for US companies. They argue that a new US-Cuba relationship must entail a lifting of Cuba's barriers to trade and investment, liberalization of its economy, and the adoption of democratic institutions. They offer a roadmap for a future US-Cuba rapprochement.

By examining the current theories, practices, and regulations and explaining them in detail, it provides a state-of-the-art overview of one of the key corporate governance issues of our time.

The End of Stationarity Mark Schapiro, 2016-05-17 Scientists have devised a new term to explain the turmoil caused by climate change: the end of stationarity. It means that our baselines for rainfall, water flow, temperature, and extreme weather are no longer relevant; that making predictions based on past experience is no longer possible. But climate change has upended baselines in the financial world too, disrupting the global economy in ways that are just becoming clear, leaving us unable to assess risk and causing us to fundamentally re-think economic priorities and existing business models. At the heart of that financial unrest is the role of carbon, and as the world moves toward making more and more polluters pay to emit it, a financial mystery unfolds. What are the costs? Who has the responsibility to pay for them? Who do you pay? How do you pay? And how will those costs ripple through the economy? These are the questions veteran journalist Mark Schapiro attempts to answer as he illuminates the struggle to pinpoint carbon's true costs and allocate them fairly, all while bumping up against

the vagaries of the free market the lobbying power of corporations the political maneuverings of countries and the tolerance of everyday consumers buying a cup of coffee a tank of gas or an airplane ticket Along the way Schapiro tracks the cost of carbon through the drought ridden farmland of California the jungles of Brazil the world's greatest manufacturing center in China the carbon trading center of Europe and the high tech crime world that carbon markets have inspired He even tracks the cost of carbon through the skies themselves where efforts to put a price tag on the carbon left by airplanes in the no man's land of the atmosphere created what amounted to a quiet but powerful global trade war The End of Stationarity deftly depicts the wild new carbon economy and shows us how nations emerging and developed teeter on its brink Originally published in hardcover as Carbon Shock the book is updated throughout and includes a new afterword based on the Paris climate talks
