June 2013 C3 Mark Scheme:

Ethics, Efficiency and Macroeconomics in China Jonathan Leightner, 2017-04-21 This book tells the story of how China's leaders from Mao to Xi have sacrificed ethics to promote either macroeconomic performance or microeconomic efficiency. This story includes Mao's collectivization of land, the Great Leap Forward, the Great Cultural Revolution, Deng's opening China to international trade, Tiananmen Square, the freeing of prices, food and medicine scandals, the 2015 surge and collapse of the Chinese stock market, the falling of China's foreign reserves and so on. In 2008, China's leaders correctly identified the best strategy as a consumption-driven growth strategy because the current world is suffering from a glut of savings. However, for that strategy to work, the Chinese need to be able to trust China's economy and leaders. In the absence of trust, people will make decisions based on extremely short time frames which will hurt China's long-run potential and continue to generate a series of speculative bubbles. In the absence of trust, wealthy Chinese will continue to move their assets abroad, putting tremendous downward pressure on the Chinese yuan. The Chinese will develop a long-run perspective and invest in China only when they can trust China's future. In today's world, trust is necessary. Trust is built on ethics. Third-Party Certifiers

Jan De Bruyne, 2019-07-12 Third Party Certifiers Jan De Bruyne Third party certifiers are organisations that are independent of a requesting entity. They attest that a product, service, information or person possesses certain qualifications or meets safety, quality or technical standards. This important book presents an in-depth analysis of the liability and obligations of certifiers, evaluates existing certification processes in selected fields and proposes new mechanisms which could increase the accuracy and reliability of certifiers' ratings, marks or reports. Highlighting the risks of errors in this activity, inaccurate certification was a major factor in the global financial crisis of 2008; the author takes a comparative approach, looking at the certification process in several European countries, Australia and the United States. Such aspects of the process as the following are thoroughly described: obligations and liability of certifiers during the certification process; risk of information asymmetry between the requesting entity and the end user; and relationship between the civil liability of certifiers and public law aspects. The analysis includes detailed research on key industries and jurisdictions and a specific proposed framework for more accurate and reliable certification. Because the efficient and effective functioning of third party certifiers is extremely important in today's world, especially in such areas as health, the environment, safety or economic values, this deeply researched contribution to an important area of commercial law, combining analysis of current issues with proposed reforms, will be welcomed by practitioners when confronted with legal issues with regard to the certification process. The book's conceptual framework will also prove highly useful for policymakers charged with developing reliable certification mechanisms.

European Climate Diplomacy in the USA and China Katrin Buchmann, 2022-08-22 Buchmann analyses the work of UK, German, Danish and Swedish embassies in the USA and China on climate change in the late 2000s and early 2010s. She relates which coalitions and narratives embassies sought to develop to convince China and the United States that

a more progressive climate policy was possible to achieve gains supporting an agreement under the UNFCCC This book shows that a key interpretation of climate diplomacy was selling trade Europe selling technology solutions to solve climate change In this narrative Europe has already done what needs to be done and outsourcing of production to China e g is ignored In the USA embassies entered coalitions with states faith groups and the military arguing that a more progressive climate policy was mandated by either God or security concerns State politicians including Democrats often actually didn't implement any climate policies Any gains were reversed through climate denial lobbying funded by corporations Embassies did not address this *The Railway Magazine* ,2005 **Backpacker** ,2001-03 Backpacker brings the outdoors straight to the reader's doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world's first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker's Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured *The Second Chief Executive of Hong Kong SAR* Joseph Y.
