Brown PhD,David S. Elliott PhD,2016-09-13 Winner of the 2018 International Society for the Study of Trauma and Dissociation ISSTD Pierre Janet Writing Award A comprehensive treatment approach for the repair and resolution of attachment disturbances in adults for use in clinical settings With contributions by Paula Morgan Johnson Paula Sacks Caroline R Baltzer James Hickey Andrea Cole Jan Bloom and Deirdre Fay Attachment Disturbances in Adults is a landmark resource for 1 understanding attachment its development and the most clinically relevant findings from attachment research

and 2 using this understanding to inform systematic comprehensive and clinically effective and efficient treatment of attachment disturbances in adults. It offers an innovative therapeutic model and set of methods for treating adult patients with dismissing anxious preoccupied or disorganized attachment. In rich detail it integrates historical and leading edge attachment research into practical effective treatment protocols for each type of insecure attachment. Case transcripts and many sample therapist phrasings illustrate how to apply the methods in practice. Part I Foundational Concepts features a comprehensive overview of the field of attachment including its history seminal ideas and existing knowledge about the development of attachment bonds and behaviors. Part II Assessment addresses the assessment of attachment disturbances. It includes an overview of attachment assessment for the clinician and a trove of practical recommendations for assessing patients attachment behavior and status both outside of and within the therapeutic relationship. In Part III Treatment the authors not only review existing treatment approaches for attachment disorders in adults but also introduce an unprecedented powerful new treatment method. This method the Three Pillars model is built on three essential clinical ingredients. Systematically utilizing ideal parent figure imagery to develop a new positive stable internal working model of secure attachment. Fostering a range of metacognitive skills. Fostering nonverbal and verbal collaborative behavior in treatment. Used together these interdependent pillars form a unified and profoundly effective method of treatment for attachment disturbances in adults a must for any clinician. In Part IV Type Specific Treatment readers will learn specific variations of the three treatment pillars to maximize efficacy with each type of insecure attachment. Finally Part V A Treatment Guide and Expected Outcomes describes treatment in a step by step format and provides a success assessment guide for the Three Pillars approach. This book is a comprehensive educational resource and a deeply practical clinical guide. It offers clinicians a complete set of tools for effective and efficient treatment of adult patients with attachment disturbances.

Fine, 2012-12-06. During the past decade there has been a renaissance of interest in the use of peritoneal dialysis as a primary dialytic modality for the treatment of children with end stage renal disease ESRD. The development of the technique of continuous ambulatory peritoneal dialysis CAPD and continuous cycling peritoneal dialysis CCPD has markedly changed the approach to children requiring dialytic therapy. The availability of these techniques has facilitated prolonged dialysis in infants and has for the first time given pediatric nephrologists in many areas of the world an opportunity to consider dialysis in children afflicted with ESRD. I have enlisted the collaboration of colleagues from Europe South America Canada and the United States in compiling this multidisciplinary text which hopefully contains the most up to date comprehensive information regarding the use of CAPD CCPD in children. It is my hope that every nephrologist pediatric

and adult nephrology nurse pediatric and adult nephrology technician or allied health professional dealing with children who require these therapeutic modalities will be able to resolve immediately any confounding clinical or technical issues that arise by using the information contained in this text Demographic data on the use of CAPD CCPD in children in Europe is provided from the EDTA Registry and in the United States from the National Peritoneal Dialysis Registry The particular problems encountered in the use xiii xiv Preface of CAPD in children in developing countries is detailed by Dr Grunberg and his colleagues in Uruguay
