**Philosophy of Language and Logic in Ancient China** Chad Hansen, 1994 **Science and Civilisation in China: Volume 7, The Social Background, Part 1, Language and Logic in Traditional China** Joseph Needham, Christoph Harbsmeier, 1998-02-19 The first systematic survey of the conceptual history of basic logical terminology in ancient China

Philosophy of language and logic in ancient China Chad D. Hansen, 1988 Name and Actuality in Early Chinese Thought John Makeham, 1994-01-01 This is the first Western study of the philosophy of Xu Gan 170-217 a Confucian thinker who lived at a nodal point in the history of Chinese thought when Han scholasticism had become ossified and the creative and independent quality that characterized Wei Jin thought was just emerging As the theme of his study Makeham develops an original and richly detailed account of ming shi name and actuality one of the key pairs of concepts in early Chinese thought He shows how Xu Gan's understanding of the name and actuality relationship was most immediately influenced by Xu Gan's understanding of why the Han dynasty had collapsed yet had its roots in a tradition of discourse that spanned the classical period circa 500-150 B C E In reconstructing the philosophical background of Xu Gan's understanding of the relationship between name and actuality Makeham identifies two antithetical theories of naming in early Chinese thought nominalist and correlative a distinction that is as great as the Realist Nominalist distinction of Western thought He shows how Xu Gan's views on the name and actuality relationship were animated on the one hand by a rejection of nominalist theories of naming and on the other hand by a novel appropriation of correlative theories of naming The study also analyzes two of the more immediate social and intellectual issues in the late Eastern Han 25-220 period that had prompted Xu Gan to

discuss the name and actuality relationship the ethos of the scholar gentry ming jiao and Han approaches to classical scholarship Makeham demonstrates how Xu Gan s critique of these matters is valuable not only as a late Han philosophical account of what had led to the demise of the 400 year old Han dynasty but also as a mode of conceptualizing that contributed to the new direction that philosophical thinking took in the third century C E

*Science and Civilisation in China: Volume 7, The Social Background, Part 2, General Conclusions and Reflections* Joseph Needham,2004-07-22 It would be difficult to overstate the importance of Joseph Needham s Science and Civilisation in China series For nearly fifty years Needham and his collaborators have revealed the ideals concepts and achievements of China s scientific and technological

traditions from the earliest times to about 1800 through this great enterprise During his long working lifetime Needham kept in draft various essays some written with collaborators in which he set out his broad views on the Chinese social and historical context These essays edited by one of his closest collaborators Kenneth Robinson are contained in the present volume A reading of this material makes it possible to reconstruct the assumptions and problematics that underpinned and drove the Needham project throughout the nearly one half century during which he was at the helm The documents gathered here reveal the intellectual foundations of one of the greatest scholarly enterprises of the twentieth century *Early China/Ancient Greece* Steven Shankman, Stephen W. Durrant, 2012-02-01 This pioneering book compares Chinese and Western thought to offer a bracing and unpredictable cross cultural conversation The work contributes to the emerging field of Sino Hellenic studies which links two great and influential cultures that in fact had virtually no contact during the ancient period The patterns of thought and the cultural productions of early China and ancient Greece represent two significantly different responses to the myriad problems that human beings confront Throughout this volume the comparisons between these cultures evince two critical ideas First that thinking is itself an inherently comparative activity Through making comparisons the familiar becomes strange and the strange somewhat more familiar Second since we think through comparisons we should think them all the way through How valid and productive are the comparisons and contrasts made between particular works and different styles of thought that emerged from two different although contemporaneous cultural contexts

**Language as Bodily Practice in Early China** Jane Geaney, 2018-03-01 Jane Geaney argues that early Chinese conceptions of speech and naming cannot be properly understood if viewed through the dominant Western philosophical tradition in which language is framed through dualisms that are based on hierarchies of speech and writing such as reality appearance and one many Instead early Chinese texts repeatedly create pairings of sounds and various visible things This aural visual polarity suggests that texts from early China treat speech as a bodily practice that is not detachable from its use in everyday experience Firmly grounded in ideas about bodies from the early texts themselves Geaney's interpretation offers new insights into three key themes in these texts the notion of speakers intentions yi the physical process of emulating exemplary people and Confucius's proposal to rectify names zhengming

Logic in Religious Discourse Andrew Schumann, 2013-05-02 Knocking on Heaven's Door is the oldest human dream that seems unrealized still Religious discourse does show the road but it requires a blind faith in return In this book logicians try to hear Heaven's Call and to analyze religious discourse As a result the notion of religious logic as a part of philosophical logic is introduced Its tasks are 1 to construct consistent logical systems formalizing religious reasoning that at first sight seems

inconsistent this research is fulfilled within the limits of modal logic paraconsistent logic and many valued logic 2 to carry out an illocutionary analysis of religious discourse this research is fulfilled in frames of illocutionary logics and 3 to formalize Ancient and Medieval logical theories used in the theology of an appropriate religion they could be studied within the limits of unconventional logics such as non monotonic logics non well founded logics etc

*Metaphorical Metaphysics in Chinese Philosophy* Derong Chen, 2011-08-16 In *Metaphorical Metaphysics in Chinese Philosophy* Illustrated with Feng Youlan's New Metaphysics Derong Chen explores Chinese philosophy through a comprehensive study and critical analysis of Feng Youlan's new metaphysics proposing a systematic analysis of meaning that differs from the approach of the comparative linguistic analysis that A C Graham and Chad Hasen employed in their studies of Chinese philosophy This detailed analysis of Feng Youlan's new metaphysics demonstrates that Feng's system is not the completely Westernized philosophical system many scholars identify it as nor is it the pure logical and analytical system Feng himself intended to construct Rather the essence and characteristics of the new metaphysics at the core of Feng's philosophical system expose his philosophy as a continuation of the Chinese philosophical tradition in a new era This approach is most applicable to scholars of comparative philosophy and of any era of Chinese philosophy
