Large Scale Livestock Grazing A Management Tool For Nature Conservation:

Large-scale Livestock Grazing Harald Plachter,Ulrich Hampicke,2010-02-02 One of the main objectives of nature conservation in Europe is to protect valuable cultural landscapes characterized by a mixture of open habitats and hedges trees and patchy woodland semi open landscapes The development of these landscapes during the past decades has been characterized by an ongoing intensification of land use on the one hand and an increasing number of former meadows and pastures becoming fallow as a result of changing economic conditions on the other hand Since species adapted to open and semi open landscapes contribute to biodiversity in Europe in a major way this development is of great concern to nature conservation In several countries largescale nature adapted pastoral systems have been recognized as one solution to this problem These systems could offer an alternative to industrial livestock raising and keep a high biodiversity on the landscape level Against the background of livestock diseases such as BSE and Foot and Mouth Disease and the efforts to reform the Common Agricultural Policy in the EU by changing the criteria for agricultural subsidies these concepts gain particular significance They could also represent an alternative to the established costly habitat management tools *Trees, Forested Landscapes and Grazing Animals* Ian D. Rotherham,2013-03-05 In this comprehensive book the critical components of the European landscape forest parkland and other grazed landscapes with trees are addressed The book considers the history of grazed treed landscapes of large grazing herbivores in Europe and the implications of the past in shaping our environment today and in the future Debates on the types of anciently grazed landscapes in Europe and what they tell us about past and present ecology have been especially topical and controversial recently This treatment brings the current discussions and the latest research to a much wider audience The book breaks new ground in broadening the scope of wood pasture and woodland research to address sites and ecologies that have previously been overlooked but which hold potential keys to understanding landscape dynamics Eminent contributors including Oliver Rackham and Frans Vera present a text which addresses the importance of history in understanding the past landscape and the relevance of historical ecology and landscape studies in providing a future vision Greening livestock: Assessing the potential of payment for environmental services in livestock inclusive agricultural production systems in developing countries ,2012-01-01 **Pasture Landscapes and Nature Conservation** Bernd Redecker,Werner Härdtle,Peter Finck,Uwe Riecken,Eckhard Schröder,2012-12-06 One of the main problems and aims of nature conservation in Europe is to protect semi open landscapes The development during the past decades is characterized by an ongoing intensification of land use on the one hand and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem The book gives an overview of the European projects concerning to this topic nature conservation policy and strategies scientific results and practical experiences creating large scale grazing systems

European Wood-pastures in Transition Tibor Hartel, Tobias Plieninger, 2014-06-27 Wood pastures are important elements of European cultural identity and have an exceptional ecological value yet they are in decline all over Europe The structure of wood pastures is strongly influenced by grazing and multiple other land uses and by local and regional environmental conditions This book examines the diverse expressions of wood pastures across Europe It provides a new perspective using a social ecological framework to explore social and ecological values governing institutions threats and conservation approaches It explores the major drivers of decline which are shown to be related to accelerated cultural institutional and developmental changes occurring across Europe over the past century Case studies are included from North Western Southern and Eastern Europe Written by renowned scholars and conservationists the book contributes to developing better locally adapted conservation policies and management approaches for wood pastures Grazing and Conservation Management Michiel F. WallisDe Vries, Jan P. Bakker, Sipke E. Van Wieren, 2012-12-06 Grazing animals enjoy an ambiguous reputation in the field of nature conservation Livestock are often treated as a scourge yet native large herbivores form the prime attraction of many a reserve This book gives the first comprehensive overview of the use of grazing as a tool in conservation management Considering in turn the ecological and historical background the impact of grazing on community structure management applications and future prospects this book examines issues such as the role of herbivores as keystone species the assessment of habitat quality and the function of scientific models in advancing grazing management Large herbivores are shown to be potentially powerful allies in the management of nature reserves particularly in the maintenance enhancement or restoration of biodiversity Grazing and Conservation Management will appeal to conservation biologists and rangeland managers providing them with a clearer understanding of grazing and conservation management

Rangeland Wildlife Ecology and Conservation Lance B. McNew, David K. Dahlgren, Jeffrey L. Beck, 2023-09-01 This open access book reviews the importance of ecological functioning within rangelands considering the complex inter relationships of production agriculture ecosystem services biodiversity and wildlife habitat More than half of all lands worldwide and up to 70% of the western USA are classified as rangelands uncultivated lands that often support grazing by domestic livestock The rangelands of North America provide a vast array of goods and services including significant economic benefit to local communities while providing critical habitat for hundreds of species of fish and wildlife This book provides compendium of recent data and synthesis from more than 100 experts in wildlife and rangeland ecology in Western North America It provides a current and in depth synthesis of knowledge related to wildlife ecology in rangeland ecosystems and the tools used to manage them to serve current and future wildlife biologists and rangeland managers in the working landscapes of the West The book also identifies information gaps and serves as a jumping off point for future research of wildlife in rangeland ecosystems While the content focuses on wildlife ecology and management in rangelands of Western North America the material has important implications for rangeland ecosystems worldwide **Principles and Methods in**

Landscape Ecology Almo Farina, 2022-05-25 This third thoroughly updated edition of a well received book presents the most complete collection of theories paradigms and methods utilized by the landscape sciences With the introduction of new ecosemiotic concepts and innovative managing procedures it offers a broad list of ecological ecosemiotical and cultural tools to investigate interpret and manage the environmental complexity according to a species specific individual based approach Readers will discover the importance of a landscape perspective to create strategic bridges between science and humanities favored by the holistic sight of sensorial visual acoustic olfactory tactile and thermal scapes Distributed in 10 chapters the content covers many aspects of the landscape sciences ranging from the description of fundamental theories principles and models originated by ecological approaches like source sink models island biogeography hierarchical theory and scale The ecosemiotical approaches like the eco field model the ecoscape paradigm and the general theory of resources are widely described and discussed A cultural approach to landscape is utilized to focus on the heritage values of territories and their environmental identity This book written in an accessible and didactic style is particularly dedicated to undergraduate and graduate students but also scholars in ecology agroforestry urban planning nature design conservation and remediation Land practitioners farmers and policymakers can use this book as an authoritative guide to better understand the function and role of environmental systems according to a social economic integrated perspective

Grassland Productivity and Ecosystem Services Gilles Lemaire, 2011 Grassland ecosystems are deeply affected by human activities and need appropriate management to optimise trade offs between ecosystem functions and services Until now they have mainly been analysed as agro ecosystems for animal production but this book looks beyond the role of grassland as a feeding ground and evaluates other important processes such as carbon sequestration in soils greenhouse gas regulation and biodiversity protection This authoritative volume expertly highlights the need for an immediate balance between agriculture and ecological management for sustainability in the future

Agricultural Knowledge and Knowledge Systems in Post-Soviet Societies Anna-Katharina Hornidge, Anastasiya Shtaltovna, Conrad Schetter, 2016-02-02 This volume addresses the crucial role of knowledge and innovation in coping with and adapting to socio economic and political transformation processes in post Soviet societies Unique are the bottom up or micro sociological and ethnographic perspectives offered by the book on the processes of post Soviet transformations in Central Asia and the Southern Caucasus Three thematic fields form the structuring frame cultures of knowledge production and sharing in agriculture local governance arrangements and knowledge production and finally the present situation of agricultural advisory services development
