## **Lizard And The Sun:**

La Lagartija Y El Sol Alma Flor Ada, 1997 Once a long long time ago the sun disappeared from the sky Everything was dark for many days All the animals went to search for the sun in the rivers and lakes through the fields and forests but the sun was nowhere to be found Little by little all the animals gave up except for the faithful lizard Finally one day she found a strange glowing rock and discovered the sun fast asleep But no one could persuade the sun to wake up Then the emperor organized a great feast with the finest dancers and musicians so the sun would wake up and never fall asleep again Since that day all lizards love to lie in the sun to remember the day when one of their own brought light and warmth back to the world *Lizard in the Sun* Joanne Ryder, 1994-01-01 A child is transformed into an anole for a day and discovers what it is

The Limits of Fabrication Nathan Brown, 2017-01-02 Poetry or poesis has long been understood as a practice of making But how are experiments in the making of poetic forms related to formal making in science and engineering The Limits of Fabrication takes up this question in the context of recent developments in nanoscale materials science investigating concepts and ideologies of form at stake in new approaches to material construction Tracing the direct pertinence of fields crucial to the new materials science nanotechnology biotechnology crystallography and geodesic design in the work of Shanxing Wang Caroline Bergvall Christian Bök and Ronald Johnson back to the midcentury development of Charles Olson s objectist poetics Nathan Brown carves out a tradition of constructivist nonorganic poetics that has developed in conversation with science and engineering While proposing a new approach to the relation of techn craft skill and poesis making forming this book also intervenes in philosophical debates concerning the concept of the object the distinction between organic and inorganic matter theories of self organization and the relation between design and nature Engaging with Heidegger

Morris first gives an illuminating analysis of sense showing how it requires understanding nature as engendering new norms. He then presents innovative studies of Merleau Ponty's *The Structure of Behavior* and *Phenomenology of Perception*, revealing how these early works are oriented by the problem of sense and already lead to difficulties about nature, temporality, and ontology that preoccupy Merleau Ponty's later work. Morris shows how resolving these difficulties requires seeking sense through its appearance in nature prior to experience, ultimately leading to radically new concepts of nature, time, and philosophy. Merleau Ponty's *Developmental Ontology* makes key issues in Merleau Ponty's philosophy clear and accessible to a broad audience while also advancing original philosophical conclusions.
