Campbell-Whatley, Diane Rodríguez, Jugnu Agrawal, 2021-06-11 This innovative STEAM guide will help general and special education teachers to increase effective instruction with adolescents grades 5-10. The authors show teachers how to link STEM concepts with popular fiction and film selections as a catalyst to launch student interactions, discussions, projects, and investigations. This approach will promote problem solving and reasoning skills by initiating the scientific process rather than simply presenting established facts. The book includes a wealth of lesson plans that connect abstract STEM ideas to realistic experiences that students encounter. Sample lessons call on students to produce drawings and models that move STEM to STEAM. Grounded in popular film and some of the most read young adult books, the text includes teaching strategies found to be effective with traditionally underserved students and those with disabilities. **Book Features:** Standards-based STEM lessons interrelated and interwoven with writing, reading, speaking, and other skills. **Novelistic Inquiries into the Mind** Grzegorz Maziarczyk, Joanna Klara Teske, 2016-09-23 Novelistic Inquiries into the Mind traces the multiple relations between the mind and the contemporary novel. The contributors here examine various types of narrative fiction ranging from the postmodern novels of J. M. Coetzee and Ian McEwan through the experimental prose of Leslie Scalapino to the popular fiction of James Dashner and Christopher Moore. On the one hand, they investigate novelistic representations of various mind-related issues, including different states of consciousness, Alzheimer's disease, thought experiments, and formation of the self. On the other, by analysing and evaluating in these contexts such narrative devices as unreliable narration, development of conceptual networks, or multimodal integration of verbal and non-verbal semiotic resources, they exemplify the multiplicity of techniques whereby the novel can explore the intricacies of mental processes. Taken together, the essays collected here demonstrate the potential of the novel as a genre for representing the mind. In its exploration of the problems involved in the linguistic construction of reality, the cognitive function of art, and the uncertain status of consciousness, the contemporary novel thus reflects the mind's urge to understand itself as well as possible meanings of its own perceptions, creations, and projections.
