## **Geography Pmemorandum Trial 2013:**

**The Geography of Injustice** Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

*Emptied Lands* Alexandre Kedar, Ahmad Amara, Oren Yiftachel, 2018-02-27 *Emptied Lands* investigates the protracted legal planning and territorial conflict between the settler Israeli state and indigenous Bedouin citizens over traditional lands in southern Israel Palestine The authors place this dispute in historical legal geographical and international comparative perspectives providing the first legal geographic analysis of the dead Negev doctrine used by Israel to dispossess and forcefully displace Bedouin inhabitants in order to Judaize the region The authors reveal that through manipulative use of Ottoman British and Israeli laws the state has constructed its own version of terra nullius Yet the indigenous property and settlement system still functions creating an ongoing resistance to the Jewish state *Emptied Lands* critically examines several key land claims court rulings planning policies and development strategies offering alternative local regional and international routes for justice

**Terrorism on Trial** Nicole Nguyen, 2023-09-26 A landmark sociological examination of terrorism prosecution in United States courts Rather than functioning as a final arbiter of justice U S domestic courts are increasingly seen as counterterrorism tools that can incapacitate terrorists maintain national security operations domestically and produce certain narratives of conflict *Terrorism on Trial* examines the contemporary role that these courts play in the global war on terror and their use as a weapon of war hunting criminalizing and punishing entire communities in the name of national security Nicole Nguyen advocates for a rethinking of popular understandings of political violence and its root causes encouraging readers to consider anti imperial abolitionist alternatives to the criminalization prosecution and incarceration of individuals marked as real or perceived terrorists She exposes how dominant academic discourses geographical imaginations and social processes have shaped terrorism prosecutions as well as how our fundamental misunderstanding of terrorism has led to punitive responses that do little to address the true sources of violence

such as military interventions colonial occupations and tyrannical regimes Nguyen also explores how these criminal proceedings bear on the lives of defendants and families seeking to understand how legal processes unevenly criminalize and disempower communities of color A retheorization of terrorism as political violence Terrorism on Trial invites readers to carefully consider the role of power and politics in the making of armed resistance addressing the root causes of political violence with a goal of building toward a less violent and more liberatory world **The Betrayal** Kim Christian

Priemel, 2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany's divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler's rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials The Betrayal thus also explores how history underpins transitional trials as we encounter them in today's courtrooms from Arusha to The Hague **A**

**Postcolonial Critique of the Linde et al. v. Arab Bank, PLC "Terrorism" Bank Cases** Marouf Hasian, Jr., 2016-04-29 This book provides readers with a postcolonial reading of the case of Linde et al v Arab Bank PLC and argues that American courtrooms are being used by rhetors to tell Anglo American stories about Hamas the causes of the Second Intifada and the importance of drying up terrorist financing **The Struggle for Jerusalem's Holy Places** Wendy Pullan, Maximilian

Sternberg, Lefkos Kyriacou, Craig Larkin, Michael Dumper, 2013-11-20 The Struggle for Jerusalem's Holy Places investigates the role of architecture and urban identity in relation to the political economy of the city and its wider state context seen through the lens of the holy places Reflecting the broad disciplinary backgrounds of the authors this book provides perspectives from architecture urbanism and politics and provides in depth investigations of historical ethnographic and policy related case studies The research is substantiated by fieldwork carried out in Jerusalem over the past ten years as part of the ESRC Large Grants project Conflict in Cities By analysing new dynamics of radicalisation through land seizure the

politicisation of parklands and tourism the strategic manipulation of archaeological and historical narratives and material culture and through examination of general appropriation of Jerusalem's varied rituals memories and symbolism for factional uses the book reveals how possibilities of co existence are seriously threatened in Jerusalem Shedding new light on the key role played by everyday urban life and its spatial settings for any future political agreements about the city and its religious sites this book is a useful reference work for students and scholars of Middle East Studies Architecture Religion and Urban Studies

**Cultures of Witnessing** Emma Lipton, 2022-05-10 Like other compilations of medieval urban drama the plays that were performed in the streets of York on the Feast of Corpus Christi from the late fourteenth century until the third quarter of the sixteenth have most frequently been discussed in the context of the devotional cultures and practices of the later Middle Ages The pageants preoccupation with law and with witnessing in particular has received much less attention Emma Lipton observes yet the cycle of forty seven plays which together tell the story of human history from the Creation through the Last Judgment contains an extended sequence that stages the trials of Christ leading up to the Crucifixion and legal discourse features prominently elsewhere as well While the play collections associated with other cities also engage with legal concepts the York Plays devote an unusual amount of attention to the law Lipton contends It is no coincidence that the plays themselves are preserved alongside a wide range of legal records in the York Memorandum Books repositories of civic documents that were kept in the city's guildhall Engaging both theater and legal studies Lipton is concerned in particular with the interfaces in the York Plays between dramatic practice and legal concepts of witnessing In medieval English courts witnesses were defined as neighbors they spoke both to what they had seen and heard and also to common knowledge of events At the same time many legal theorists were concerned by how the temporal gap between initial experience and testimony might reshape the record of the past in light of the motives and emotions of individual witnesses and allied groups With chapters focusing on space speech affect and temporality *Cultures of Witnessing* considers how civic performance and the legal theory and practice of witnessing promoted a shared sense of urban citizenship and how this in turn provides a way to theorize late medieval religious drama whose players performed on the streets and neighborhoods in which they conducted their daily lives

**Envisioning a Stable South Sudan Special Report No. 4 May 2018 , Guyana: from Slavery to the Present** Ramesh Gampat, 2015-04-15 It is common knowledge that slavery and indenture were characterized by long hours of physical labor restriction of movement and other basic human freedoms and severe punishment for violations of draconian labor laws Less well known is the fact that nutrition was very deficient and a range of infectious diseases maimed debilitated and killed on a large scale In trying to narrow the knowledge gap with respect to Guyana Ramesh Gampat shows that extremely poor sanitary conditions hygiene and nutrition hastened infections and created a vicious cycle The British protected its own soldiers officials and colonists by establishing a medical enclave that lasted until Emancipation in 1838 Former slaves were quarantined to neglected and decaying villages and Indians to plantations Concern with health conditions appeared only during periods of epidemics and even then it was essentially for the protection of Europeans Colonial medicine opened the way for stereotyping labeling racialization of disease neutralization of potential leaders in the struggle for justice and crystallization of the view that Europeans were superior to

Blacks and Indians Shorter stature and life expectancy are good indications that slaves and indentured immigrants fared considerably less well than Europeans Several infectious diseases sickened and fell Blacks and Indians including malaria and undefined fevers pneumonia and bronchitis diarrhea and enteritis tuberculosis pneumonia and hookworm The conquest of malaria in the early 1950s initiated the epidemiological transition from communicable to chronic diseases and today NCDs account for some three quarters of all deaths in Guyana Malaria has reemerged fueled by a gold boom that consumes huge amount of mercury The potentially adverse public health consequences of the trio have been neglected *Global Implications of Development, Disasters and Climate Change* Susanna Price, Jane Singer, 2015-08-11 Displacements in the Asia Pacific region are escalating The region has for decades experienced more than half of the world's natural disasters and in recent years a disproportionately high share of extreme weather related disasters which displaced 19 million people in 2013 alone This volume offers an innovative and thought provoking Asia Pacific perspective on an intensifying global problem the forced displacement of people from their land homes and livelihoods due to development disasters and environmental change This book draws together theoretical and multidisciplinary perspectives with diverse case studies from around the region including China's Three Gorges Reservoir Japan's Fukushima disaster and the Pacific's Banaba resettlement Focusing on responses to displacement in the context of power asymmetries and questions of the public interest the book highlights shared experiences of displacement seeking new approaches and solutions that have potential global application This book shows how displaced peoples respond to interlinked impacts that unravel their social fabric and productive bases whether through sporadic protest organised campaigns empowered mobility or even community based negotiation of resettlement solutions The volume will be of great interest to researchers and postgraduate students in development studies environmental and climate change studies anthropology sociology human geography international law and human rights

**Opportunistic Spectrum Sharing and White Space Access** Oliver Holland, Hanna Bogucka, Arturas Medeisis, 2015-04-22 Details the paradigms of opportunistic spectrum sharing and white space access as effective means to satisfy increasing demand for high speed wireless communication and for novel wireless communication applications This book addresses opportunistic spectrum sharing and white space access being particularly mindful of practical considerations and solutions In Part I spectrum sharing implementation issues are considered in terms of hardware platforms and software architectures for realization of flexible and spectrally agile transceivers Part II addresses practical mechanisms supporting spectrum sharing including spectrum sensing for opportunistic spectrum access machine learning and decision making capabilities aggregation of spectrum opportunities and spectrally agile radio waveforms Part III presents the ongoing work on policy and regulation for efficient and reliable spectrum sharing including major recent steps forward in TV White Space TVWS regulation and associated geolocation database approaches policy management aspects and novel licensing schemes supporting spectrum sharing In Part IV business and economic aspects of spectrum sharing are considered including

spectrum value modeling discussion of issues around disruptive innovation that are pertinent to opportunistic spectrum sharing and white space access and business benefits assessment of the novel spectrum sharing regulatory proposal

Licensed Shared Access Part V discusses deployments of opportunistic spectrum sharing and white space access solutions in practice including work on TVWS system implementations standardization activities and development and testing of systems according to the standards Discusses aspects of pioneering standards such as the IEEE 802.22 Wi-Fi standard the IEEE 802.11af White-Fi standard the IEEE Dynamic Spectrum Access Networks Standards Committee standards and the ETSI Reconfiguration Radio Systems standards Investigates regulatory and regulatory linked solutions assisting opportunistic spectrum sharing and white space access including geo location database approaches and licensing enhancements Covers the pricing and value of spectrum the economic effects and potentials of such technologies and provides detailed business assessments of some particularly innovative regulatory proposals The flexible and efficient use of radio frequencies is necessary to cater for the increasing data traffic demand worldwide This book addresses this necessity through its extensive coverage of opportunistic spectrum sharing and white space access solutions Opportunistic Spectrum Sharing and White Space Access The Practical Reality is a great resource for telecommunication engineers researchers and students

**Bodies, Technologies and Methods** Phil Jones, 2020-04-14 This book examines how different technologies can be used to enhance research methods in the social sciences and humanities The boundary between the body and the digital has become increasingly blurred in recent years due to the rise of technologies that capture and reshape our embodied selves New technologies all too often reflect the attitudes of the privileged white men who dominate the tech sector This book thus in part considers how critical researchers can employ new technologies while challenging some of the problematic assumptions that underpin their design It also includes a series of case studies that examine the dynamic use of different techniques to explore key questions around the intersection of embodiment and the digital With a playful experimental approach to conducting research today this book offers new cutting edge methods that respond to the potential of different technologies It will be invaluable reading for undergraduate and post graduate students of social sciences and humanities to explore ways in which this approach can bring new insights to a range of interdisciplinary research questions The Report: Oman 2014 Oxford Business Group, 2014-01-15 The sultanate's economy continues to enjoy the benefits of petroleum wealth which has provided budget surpluses in most years and served as a backbone for growth However planning is well under way for an era in which oil will not be the main economic driver with the twin goals of diversification and creating an increased number of private sector jobs at the top of the government's current agenda Indeed in recent years the non-OPEC oil exporter's economy has been undergoing a steady transformation reorienting from oil toward a more diverse set of service and industry based economic activities So far progress has been promising In 2011 oil and gas accounted for 38.8% of GDP With the continuation of higher than expected energy prices in 2012 the government has increased economic investments

accordingly These investments which include infrastructure social programmes and small business development are aimed toward better preparing the country for its post fossil fuel future      Strategic Management in Emerging Markets Krassimir Todorov,Yusaf H. Akbar,2018-12-10 This textbook focuses on strategic management in emerging market contexts It delineates the border between business level strategy and corporate strategy to better align business level and corporate level strategy      *GlobalSoilMap* Dominique Arrouays,Neil McKenzie,Jon Hempel,Anne Richer de Forges,Alex B. Gomez,Blanca E. Himes,Naftali Kaminski,2020-01-30 This book serves as the primary reference for precision medicine in the fields of pulmonary critical care and sleep medicine by documenting

principles written by experts in several aspects of precision medicine. It combines fundamental concepts of the field with state-of-the-art studies and how they translate into individual preventive, diagnostic, and therapeutic plans. Precision medicine is focused on the integration of individual variability with disease prevention and treatment principles derived from population studies. This concept has risen to prominence in recent years in parallel with advances in genetics, molecular diagnostics, and novel target-specific therapies. This fundamental shift in the approach to treatment has broad implications in how we prevent, diagnose, and treat disease. Describing key concepts of precision medicine and relating these to pulmonary, critical care, and sleep disorders is essential to educate relevant stakeholders and increase the impact of pulmonary precision medicine. The book is organized into seven sections: introduction, genetics, biomarkers, precise phenotyping, mobile health, wearables, and telemedicine; precision therapeutics; and enabling widespread adoption of precision medicine. The chapters are organized with an introduction to the specific theme followed by its basic concepts. They then delve into how these basic concepts relate to the larger theme of precision medicine, new precision medicine approaches to dealing with these problems, and key takeaway points. Liberally illustrated with images, figures, and tables, the text is thorough and intuitive for clinicians and researchers to learn the processes and applications of precision medicine. This is an ideal guide for clinicians to learn new precision medicine concepts in the fields of genetics, genomics, mobile health, and how they apply to their practice and their patients, as well as researchers seeking a basic understanding of precision medicine to assist in designing future research studies.
