Exploring New Horizons and Challenges for Social Studies in a New Normal Idris, Agus Purnomo, Muhamad Alif Haji Sismat, Zawawi Isma'il, Luechai Sringernyuang, 2022-05-26 The new standards and changes exist in social science studies Covid 19 especially in Indonesia at the end of 2019 has an impact on changes in every sector of life This change is a form of community adaptation Therefore this conference aims to explore theoretical and practical developments of the social sciences to build academic networks while gathering academics from various research institutes and universities This book

provides the new standard and encourages many thoughts in theoretical and empirical studies in the social field. The scope that can be generated in this standard includes patterns, opportunities, and challenges in social science learning to new standards, learning innovation, and implementing new learning standards in Indonesia, which was adopted in the form of the Merdeka Belajar program. The study results will fill the gaps in knowledge in the new social life and social science. Therefore, this book aims to mediate the researchers in the same field to discuss and find solutions to current issues in the social field and build cooperation and synergy in creative ideas to work together to create joint research. This book will be interesting to students, scholars, and practitioners who have a deep concern in social science. It is futuristic with a lot of practical insights for the students, faculty, and practitioners. Since the contributors are from across the globe, it is fascinating to see the global benchmarks.

Is the Planet Full? Ian Goldin, 2014-05-15. What are the impacts of population growth? Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? While it is common to hear about the problems of overpopulation, might there be unexplored benefits of increasing numbers of people in the world? How can we both consider and harness the potential benefits brought by a healthier, wealthier, and larger population? May more people mean more scientists to discover how our world works, more inventors and thinkers to help solve the world's problems, more skilled people to put these ideas into practice? In this book, leading academics with a wide range of expertise in demography, philosophy, biology, climate science, economics, and environmental sustainability explore the contexts, costs, and benefits of a burgeoning population on our economic, social, and environmental systems.
