**Childhood and the Production of Security** J Marshall Beier, 2018-02-02 Responding to security scholars' puzzling dearth of attention to children and childhoods, the contributors to this volume reveal the ways in which they not only are already present in security discourses but are actually indispensable to them and to the political projects they make possible. From zones of conflict to everyday life contexts in the post-industrial Global North, dominant ideas about childhood work to regulate the constitution of political subjects whilst variously enabling and foreclosing a wide range of political possibilities. Whether on the battlefields of Syria, in the halls of the UN, or the conceptual musings of disciplinary Security Studies, claims about or ostensibly on behalf of children are ubiquitous. Recognizing children as engaged political subjects, however, challenges us to bring a sustained critical gaze to the discursive and semiotic deployments of children and childhood in projects not of their making as well as to the ways in which power circulates through and around them. This book was originally published as a special issue of *Critical Studies on Security*.

**Territorial Policy and Governance** Iain Deas, Stephen Hincks, 2017-02-24 In response to both policy and conceptual debates, alternative narratives have begun to emerge about territorial governance and policymaking. As local and regional policy actors strive to respond to

**Obstructive Marketing** Maitland Hyslop,2016-05-23 In Obstructive Marketing Maitland Hyslop deals with a very negative kind of activity which embraces activities legal or otherwise designed to prevent or restrict the distribution of a product or service temporarily or permanently against the wishes of the product manufacturer service provider or customer When the author defined this phenomenon as Obstructive Marketing and started to research it more than a decade ago it was seen as a valid concept that was perhaps ahead of its

time The World has moved on and in the era of globalization a study of this negative aspect of marketing is now required Obstructive Marketing is now seen as the business equivalent of asymmetric warfare which is increasingly understood because the rise of the South and East at the expense of the North and West has brought some Obstructive Marketing stratagems into sharp focus Using the author s own research this book explains what Obstructive Marketing is and why it is not called Anti Marketing The author explains who practises Obstructive Marketing where when and how and why businesses are particularly vulnerable when entering new markets and engaging in change and innovation Intriguing concepts such as cultural risk are illuminated along with formal links between Obstructive Marketing asymmetric warfare and terrorism This all leads to identification of the need for a strong Government Business partnership to counter the effects of this darkest kind of marketing
