Federal Register ,2012-04 **Social Reproduction and the City** Simon Black,2020 The transformation of child care after welfare reform in New York City and the struggle against that transformation is a largely untold story In the decade following welfare reform despite increases in child care funding there was little growth in New York's unionized center based child care system and no attempt to make this system more responsive to the needs of working mothers As the city delivered

child care services on the cheap relying on non union home child care providers welfare rights organizations community legal clinics child care advocates low income community groups activist mothers and labor unions organized to demand fair solutions to the child care crisis that addressed poor single mothers need for quality affordable child care as well as child care providers need for decent work and pay Social Reproduction and the City tells this story linking welfare reform to feminist research and activism around the crisis of care social reproduction and the neoliberal city At a theoretical level Simon Black s history of this era presents a feminist political economy of the urban welfare regime applying a social reproduction lens to processes of urban neoliberalization and an urban lens to feminist analyses of welfare state restructuring and resistance Feminist political economy and feminist welfare state scholarship have not focused on the urban as a scale of analysis and critical approaches to urban neoliberalism often fail to address questions of social reproduction To address these unexplored areas Black unpacks the urban as a contested site of welfare state restructuring and examines the escalating crisis in social reproduction He lays bare the aftermath of the welfare to work agenda of the Giuliani administration in New York City on child care and the resistance to policies that deepened race class and gender inequities

Crow's demise *Race and Education in New Orleans* traces the course of the city's education system from the colonial period to the start of school desegregation in 1960. This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century. Walter C. Stern begins his account with the mid-eighteenth century kidnapping and enslavement of Marie Justine Sirnir, who eventually secured her freedom and played a major role in the development of free black education in the Crescent City. As Sirnir's story and legacy illustrate, schools such as the one she envisioned were central to the black antebellum understanding of race, citizenship, and urban development. Black communities fought tirelessly to gain better access to education, which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo even as they conceded to demands from the black community for expanded educational opportunities. The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth when conflicts over land and resources sharply intensified. Stern argues that the post-Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity; segregated schools gave rise to segregated communities, which in turn created structural inequality in housing that impeded desegregation's capacity to promote racial justice. By taking a long view of the interplay between education, race, and urban change, Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic, though often improvisational, process. A vital and accessible history, *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city's racial and urban landscapes. **The Routledge Handbook of**

Environmental Justice Ryan Holifield, Jayajit Chakraborty, Gordon Walker, 2017-09-14. *The Routledge Handbook of Environmental Justice* presents an extensive and cutting-edge introduction to the diverse, rapidly growing body of research on pressing issues of environmental justice and injustice. With wide-ranging discussion of current debates, controversies, and questions in the history, theory, and methods of environmental justice research contributed by over 90 leading social scientists, natural scientists, humanists, and scholars from professional disciplines from six continents, it is an essential resource both for newcomers to this research and for experienced scholars and practitioners. The chapters of this volume examine the roots of environmental justice activism, lay out and assess key theories and approaches, and consider the many different substantive issues that have been the subject of activism, empirical research, and policy development throughout the world. The Handbook features critical reviews of quantitative, qualitative, and mixed methodological approaches and explicitly addresses interdisciplinarity, transdisciplinarity, and engaged research. Instead of adopting a narrow regional focus, it tackles substantive issues and presents perspectives from political and cultural systems across the world, as well as addressing activism for environmental justice at the global scale. Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research, policy, and practice. Providing detailed but accessible overviews of the

complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists
