and the Pemberton Line the region's relations with its international neighbours China Bhutan Myanmar Bangladesh and Nepal as well as the issue of many formerly non state bearing populations awakening to the reality of the modern state Lucid and analytical this book will be of great interest to scholars and researchers of Northeast India modern Indian history international relations defence and strategic studies and political science

**Intergenerational Mobilities** Lesley Murray, Susan Robertson, 2016-10-04 Drawing from work on mobilities and geographies of the lifecourse this collection is concerned with the ways in which age as a relational concept is constructed and played out in mobile urban space With studies of ageing and mobility often focusing on discrete age groups most notably children and older people this study seeks to fill a gap in existing literature by exploring mobility in relation to the lifecourse and generation looking not only at the margins Whilst some generations are increasingly mobile others are less so and this disparity in mobility opportunity is relational as age is relational This book addresses gaps in knowledge in relational geographies of ageing whilst contributing to literature on mobility and transport in particular the burgeoning field of mobility in justice Here mobility is considered in its broadest sense for example in relation to the movement or lack of movement of bodies and to computer mediated intergenerational communications Through focusing on urban mobile spaces from very local spaces of medical care to global spaces of migration that are the context for intergenerational mobilities this collection explores these interdependencies and considers ways in which intergenerational mobilities are conceptualised and researched

**America Ascendant** Stanley B. Greenberg, 2015-11-03 America is poised to lead the 21st Century as it led the 20th That will happen because the country is at a tipping point in the battle for its own renewal a renewal that will allow America to be exceptional again Our economy is on the move fueled by revolutions in energy immigration innovation big data and advanced manufacturing America's energy independence has set off shockwaves Just as important are the social transformations that are making the country ever more racially and culturally diverse younger a home to immigrants and the metropolitan centers that foster a rising economic and cultural dynamism While most other countries struggle profoundly with immigration and religious and racial differences America's on a path to multicultural identity Those revolutions in the economy society and culture and are also producing a new American majority that embraces new values and new politics Republicans are waging a counter revolution and that is why America looks gridlocked and why the country is turning to Democrats to take on the country's growing challenges The economic and social transformations leave people struggling to earn enough and reach the middle class Families are under stress Government is corrupted by big money The American public is demanding the country address the dark side of our progress and reforms are starting to happen That is why Democrats will get to lead an era of reform and renewal comparable to the progressive era that mitigated the excesses of the Industrial Revolution In this incisive book expert strategist Greenberg draws on years of research and polling to illuminate how America is far from being gridlocked and he articulates a powerful vision of how American politics and America can be renewed

**Geographical Data Science and Spatial Data**

**Analysis** Lex Comber, Chris Brunsdon, 2020-12-02 We are in an age of big data where all of our everyday interactions and transactions generate data. Much of this data is spatial; it is collected somewhere and identifying analytical insight from trends and patterns in these increasingly rich digital footprints presents a number of challenges. Whilst other books describe different flavours of Data Analytics in R and other programming languages, there are none that consider Spatial Data, i.e. the location attached to data, or that consider issues of inference linking Big Data, Geography, GIS Mapping and Spatial Analytics. This is a learning-by-doing textbook building on the previous book by the same authors, *An Introduction to R for Spatial Analysis and Mapping*. It details the theoretical issues in analyses of Big Spatial Data and developing practical skills in the reader for addressing these with confidence.

**A University Education** David Willetts, 2017-11-17 Universities have a crucial role in the modern world. In England, entrance to universities is by nationwide competition, which means English universities have an exceptional influence on schools, a striking theme of the book. This important book first investigates the university as an institution and then tracks the individual on their journey to and through university. In *A University Education*, David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual. The book also makes illuminating comparisons with higher education in other countries, especially the US and Germany. Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014, the author offers a powerful account of the value of higher education and the case for more expansion. He covers controversial issues in which he was involved, from access for disadvantaged students to the introduction of 9,000 fees. The final section addresses some of the big questions for the future, such as the relationship between universities and business, especially in promoting innovation. He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly. This is an authoritative account of English universities, setting them for the first time in their new legal and regulatory framework.

**Reconciling Cultural and Political Identities in a Globalized World** Michális Michael, 2016-04-29 Though geographically far apart, Turkey and Australia are much closer than many would think. This collection provides a relevant comparative and comprehensive study of two countries seeking to reconcile their history with their geography.

**Palestinian Refugees in International Law** Francesca Albanese, Lex Takkenberg, 2020 The Palestinian conflict has produced one of the most tragic refugee crises since World War II, with the number of refugees caused by the violence associated with the creation of the State of Israel numbering around 11 million in 2011. The much lauded first edition in 1998 of *The Status of Palestinian Refugees in International Law* was the first book to comprehensively analyse the legal aspects of the Palestinian refugee crisis; yet the last two decades have seen multiple developments. New waves of conflict and displacement have affected Palestinian refugees in the Middle East, and there has been Israeli encroachment on Palestinian territory. Hamas has grown, and a schism has formed within the first Palestinian government. The so-called Arab Spring has

impacted the life fate and legal status of thousands of Palestinian refugees In international legal jurisprudence change has been similarly rapid In 2004 the International Court of Justice delivered a crucial advisory opinion on the Separation Wall authoritatively elucidating the international legal framework applicable to the Israeli occupation Numerous international human rights bodies and UN fact finding missions have added their analysis to the mix The possibility of the State of Palestine joining the International Criminal Court has spurred discussion relating to the applicability of international criminal law to Palestinian refugees Clear compelling and authoritative Lex Takkenberg and Francesca Albanese discuss the status quo both on the ground and in the courts and pose future scenarios to come

### **Development Challenges and Solutions**

**After the Arab Spring** Ali Kadri, 2016-01-26 Since the events of 2011 most Arab countries have slipped into a state of war and living conditions for the majority of the working population have not changed for the better This edited collection examines the socioeconomic conditions and contests the received policy framework to demonstrate that workable alternatives do exist

### **Climate Consciousness and Environmental Activism in Composition** Joseph R.

Lease, 2020-02-18 Now more than ever in a time when Americans still do not believe that humans are the primary cause of Earth's climate change crisis the burden on educators to inform challenge and motivate students about sustainability is greater than it ever has been On college campuses writing intensive courses often located within First Year or General Education curricula are an ideal place to take up this charge because of the flexibility of their content and the high volume of students that they reach In this volume a varied group of composition instructors with wide ranges and types of experiences provides best practices for bringing issues surrounding climate change into the writing classroom From literature based composition and creative writing courses to design thinking workshops to seminars against sustainability the authors in this volume lay out a multitude of possibilities for blending writing and environmental concerns that fellow practitioners can easily adopt or modify for their own use

### *Commodification of Global Agrifood Systems and Agro-Ecology* Yıldız

Atasoy, 2017-05-18 This book explores the shifting relations of food provisioning in Turkey from a comparative global political economy perspective It offers in depth ethnographic analysis interviews and historical insights into the ambiguities and diversities that simultaneously affect the changing conditions of food and agriculture in Turkey Specific issues examined include the commodification of land food and labour the expansion and deepening of industrial standardization the expansion of a supermarket model and concomitant changes in as well as the simultaneous co existence of traditional methods of production and marketing Contrasting observations are drawn from diverse locales to provide examples of convergence divergence and cohabitation in relation to transnationally advocated industrial models Commodification of Global Agrifood Systems and Agro Ecology employs a form of comparative perspective that allows the particular processes of restructuring of agrifood relations in Turkey to be simultaneously distinguished from yet related to changes taking place in global power dynamics Yıldız Atasoy explores agrifood transformation in Turkey with a unique approach that considers a plurality of
