Mohan,2014-06-12 China's recent stepping up of relations with Africa is one of the most significant developments on the African continent for decades. For some it promises an end to Africa's dependent aid relationships as the Chinese bring expertise, technology and a stronger business focus. But for others it is no more than a new form of imperialism. This book is the first to systematically study the motivations, relationships and impact of this migration. It focuses not just on the Chinese migrants but also on the perceptions of and linkages to their African hosts. By studying this everyday interaction we get a much richer picture of whether this is South-South cooperation as political leaders would have us believe or a more complex relationship that can both compromise and encourage African development. *Strategic Management and Policy in the Global Aviation Industry* Kurnaz, Salim, Rodrigues, Antonio, Padhra, Anil, 2024-04-09 The aviation industry presents a unique conundrum with the complex relationship between government oversight and business management. While the aviation industry operates in a business-oriented manner, a considerable number of aviation companies and airports worldwide are still government-owned. The COVID-19 pandemic has accentuated the pivotal role of governments in the industry, highlighting the need for a comprehensive understanding of this interaction given the sector's massive economic influence and the extensive investment required. The need for an in-depth exploration of this liaison has never been more pressing. *Strategic Management and Policy in the Global Aviation Industry* offers an insightful and comprehensive solution to this enigmatic issue. This book delves into the dynamics of the aviation sector's reliance on government intervention and support, providing invaluable perspectives for academic scholars and industry enthusiasts. It explores the critical role governments play in the development and sustainability of aviation companies, especially in the wake of the pandemic where governments worldwide stepped in to bolster their national aviation companies. Additionally, the book explores the industry's efforts to align with the United Nations sustainability targets and the critical influence of government regulations in achieving these goals. It also dissects the digital transformation and the integration of innovative technologies in aviation, setting the stage for a more efficient and innovative industry. Furthermore, it unveils the burgeoning role of artificial intelligence in the quest for cost reduction and enhanced operational efficiency in the fiercely competitive aviation market. *The Business of Sustainable Tourism Development and Management* Susan L. Diaspora: A Very Short Introduction Kevin Kenny, 2013-06-17 What does diaspora mean Until quite recently the word had a specific and restricted meaning referring principally to the dispersal and exile of the Jews But since the 1960s the term diaspora has proliferated to a remarkable extent to the point where it is now applied to migrants of almost every kind This Very Short Introduction explains where the concept of diaspora came from how its meaning changed over time why its usage has expanded so dramatically in recent years and how it can both clarify and distort the nature of migration Kevin Kenny highlights the strength of diaspora as a mode of explanation focusing on three key elements movement connectivity and return and illustrating his argument with examples drawn from Jewish Armenian African Irish and Asian diasporas He shows that diaspora is not simply a synonym for the movement of people Its explanatory power is greatest when people believe that their departure was forced rather than voluntary Thus diaspora would not really explain most of the Irish migration to America but it does shed light on the migration compelled by the Great Famine Kenny also describes how migrants and their descendants develop diasporic cultures abroad regardless of the form their migration takes based on their connections with a homeland real or imagined and with people of common origin in other parts of the world Finally most conceptions of diaspora feature the dream of a return to a homeland even when this yearning does not involve an actual physical relocation About the Series Oxford's Very Short Introductions series offers concise and original introductions to a wide range of subjects from Islam to Sociology Politics to Classics Literary Theory to History and Archaeology to the Bible Not simply a textbook of definitions each volume in this series provides trenchant and provocative yet always balanced and complete discussions of the central issues in a given discipline or field Every Very Short Introduction gives a readable evolution of the subject in question demonstrating how the subject has developed and how it has influenced society Eventually the series will encompass every major academic discipline offering all students an accessible and abundant reference library Whatever the area of study that one deems important or appealing whatever the topic that fascinates the general reader the Very Short Introductions series has a handy and affordable guide that will likely prove indispensable

Hall,M.D. Swaine,2013-04-18 It is a privilege to be asked and a pleasurable duty for me to write the foreword of this book The conservation and wise utilisation of the humid tropical forests a unique biome are matters of great concern and importance to millions living within and around these forests and perhaps less directly to the totality of mankind These forests provide many essential products and services for mankind The list is lengthy and need not be repeated here Suffice it to say that there are not many aspects of human activity which do not utilise some of these products services or derivatives therefrom Yet it is the view of those most closely associated with the study of these forests that what is known is but a minuscule portion of whatthere is to know The products and services now utilised are perhaps some infinitesimal part of the full potential All over the tropical world however these forests are being destroyed At first slowly but now surely gathering tempo This is true also of Ghana Tracts offorest land are converted to other uses often ephemeral and not sustained Irreversible changes take place in our environment The gains are shortlived the losses unobtrusively accumulate and stay forever The accelerating rate of deforestation in the face of our relatively scanty knowledge of this biome is indeed a sad reflection of the state of human affairs It is in this setting that one welcomes this
