Carroll,Elyn Rykken,2018-12-20 Geometry The Line and the Circle is an undergraduate text with a strong narrative that is written at the appropriate level of rigor for an upper level survey or axiomatic course in geometry Starting with Euclid s Elements the book connects topics in Euclidean and non Euclidean geometry in an intentional and meaningful way with historical context The line and the circle are the principal characters driving the narrative In every geometry considered which include spherical hyperbolic and taxicab as well as finite affine and projective geometries these two objects are analyzed and highlighted Along the way the reader contemplates fundamental questions such as What is a straight line What does parallel mean What is distance What is area There is a strong focus on axiomatic structures throughout the text While Euclid is a constant inspiration and the Elements is repeatedly revisited with substantial coverage of Books I II III IV and VI non Euclidean geometries are introduced very early to give the reader perspective on questions of axiomatics Rounding out the thorough coverage of axiomatics are concluding chapters on transformations and

constructibility The book is compulsively readable with great attention paid to the historical narrative and hundreds of attractive problems **A Course of Mathematics** Charles Hutton,1860 The Mathematics Teacher ,1921 The Texas Mathematics Teachers' Bulletin ,1916 Homework Helpers: Geometry Carolyn C. Wheeler,2007-04-25 This new title in the Homework Helpers series will reinforce mathematical foundations and bolster students confidence in geometry The concepts are explained in everyday language before the examples are worked Good habits such as checking your answers after every problem are reinforced There are practice problems throughout the book and the answers to all of the practice problems are included The problems are solved clearly and systematically with step by step instructions provided Particular attention is placed on topics that students traditionally struggle with the most While this book could be used to supplement standard geometry textbooks it could also be used by college students or adult learners to refresh long forgotten concepts and skills Homework Helpers Geometry includes all the topics that are traditionally covered in a high school geometry course including Parallel lines Congruent lines Quadrilaterals and other polygons Similarity and special triangles Right triangle trigonometry Circles Area volume and solids **Resources for Teaching Mathematics: 11-14** Colin Foster,2011-09-22 This resource contains 50 ready to use mathematics lesson plans suitable for the whole department to use with learners aged 11 14 Each plan consists of a teacher s sheet which breaks down the lesson into time allocated sections from starter through to homework together with a photocopiable or downloadable student task sheet to give out There is also a companion website with extra material to support the lesson plans in the book giving teachers the time and confidence to try new activities in the classroom with minimal preparation The lesson tasks are open ended and encourage deep mathematical thinking allowing learners to explore different topics creatively through solving problems in their own way This is an essential resource for any busy teacher of mathematics Geometric Folding Algorithms Erik D.
