**Urban Wildlife Management** Clark E. Adams, 2018-09-03 Winner of the 2018 TWS Wildlife Publication Awards in  
the authored book category Urban development is one of the leading worldwide threats to conserving biodiversity In the near  
future wildlife management in urban landscapes will be a prominent issue for wildlife professionals This new edition of Urban  
Wildlife Management continues the work of its predecessors by providing a comprehensive examination of the issues that  
increase the need for urban wildlife management exploring the changing dynamics of the field while giving historical  
perspectives and looking at current trends and future directions The book examines a range of topics on human interactions  
with wildlife in urbanized environments It focuses not only on ecological matters but also on political economic and societal  
issues that must be addressed for successful management planning This edition features an entirely new section on urban  
wildlife species including chapters on urban communities herpetofauna birds ungulates mammals carnivores and feral and  
introduced species The third edition features Five new chapters 12 updated chapters Four new case studies Seven new  
appendices and species profiles 90 new figures A comprehensive analysis of terrestrial vertebrate locations by state and  
urban observations Each chapter opens with a set of key concepts which are then examined in the following discussions  
Suggested learning experiences to enhance knowledge conclude each chapter The species profiles cover not only data about  
the animal concerned but also detail significant current management issues related to the species An updated and expanded

Science and Policy introduces students and managers to complex conservation and management issues facing coastal nations  
of the world their citizens and international and non governmental organizations It aims to reduce complexity and inspire a  
greater consensus for more effective conservation action Presents the coastal realm as a heterogeneous diverse ecosystem of  
exceptionally high biological diversity and productivity and where conservation challenges are most difficult and urgent  
Examines the critical issues facing coastal marine conservation and the mechanisms for dealing with them Reviews the basic  
science required for addressing conservation issues by presenting the coastal realm as a land sea ecosystem of global  
significance and by reviewing the natural history features of coastal marine organisms Presents three ecologically and  
latitudinally distinct real world case studies to create a context for understanding of regional systems their cultures and their  
conservation the polar Bering Sea the temperate Chesapeake Bay and the tropical Bahamas Makes apparent the ecological

stresses on the coastal realm increasing rates of ecosystem change loss of ecosystem health and fragmented governance Synthesizes the major challenges for conservation and suggests future policy and management strategies including ecosystem management and needs for achieving sustainability and addressing the environmental debt This book is intended for undergraduates and graduates taking courses in coastal and marine conservation and management as well as those actively engaged in coastal marine conservation activities and gives the reader a clear steer to future management approaches References additional to those in the book are available at [http://www.blackwellpublishing.com/pdf/ray\\_references.pdf](http://www.blackwellpublishing.com/pdf/ray_references.pdf) The artwork is available to download at <http://www.blackwellpublishing.com/ray>
