Identity and Collaboration in World of Warcraft

Phillip Michael Alexander, 2018-03-25 *Electracy and Transmedia Studies Series* Editors Jan Rune Holmevik and Cynthia Haynes *IDENTITY AND COLLABORATION IN WORLD OF WARCRAFT* tells the story of what happens when a Cherokee gamer using a storyteller's perspective and a methodology built from equal parts Indigenous tradition and current academic field knowledge spends a year in what was at the time the largest online video game in the world. Following from work by James Paul Gee and Bonnie Nardi, Phillip Michael Alexander ventured forth into the game world to see what someone who was a gamer long before he was an academic might see in this same fascinating virtual space. In working with playing with and sharing the stories of a ten person raid group, players performing at the highest level within the game, he set out to determine how those gamers most invested in success built identities and communities. The resulting work is a reader friendly theory informed virtual boots on the virtual ground look at how gamers craft in game identities, find like minded gamers to form group identities, then organize to do staggering amounts of work in a virtual world. For anyone who ever wondered what the appeal of World of Warcraft is, Phillip Michael Alexander illustrates how some of the most active, most engaged and most talented players spend their time in that virtual world. *Behind the Veil* John Ringo, Lydia Sherrer, 2025-08-05 In the world of the cutthroat augmented reality game *TransDimensional Hunter*, Lynn Raven must outsmart stalker fans and a rogue algorithm forcing her to push her limits to survive and win the championship. Truth is stranger than fiction and it'll kill you a whole lot faster. When Lynn Raven set out to win the championship for groundbreaking augmented reality game *TransDimensional Hunter*, the worst she thought she'd face was sunburn, mosquito bites and annoying spectators. The more she plays, though, the higher the stakes become and the stranger the obstacles she has to face. From dodging fans turned stalkers to managing inter team sabotage to surviving the increasingly bizarre antics of a game algorithm that seems to have it out for her, Lynn isn't sure how much more she can take. And then the other shoe drops. If Lynn has any hope of coming out alive and on top, she'll have to up her game beyond anything she thought possible. And even that might not be enough. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for *Into the Real*: The disturbing realism is balanced by dangerous monsters, clever tactics, explosive action, and a compelling twist at the end. Immersive, highly technical, near future SF, perfect for dedicated gamers or for fans of Ernest Cline's *Ready Player One*. Library Journal: I found myself enjoying the story and Raven's relationship with the AI that's her guide in the game, and I was invested throughout. It wasn't so much a coming of age story as a growing into and appreciating one's own skin. I'm really looking forward to how things will play out from here. *The Magazine of Fantasy Science Fiction*: Ringo and Sherrer have created a modern day *Ender's Game* using the technology of Pokémon Go. The characters are vivid and interesting, and the action is strong enough to carry you along. *Upstream Reviews*: The futuristic world of the gamers and the game itself will interest SF readers. Teens will relate to Lynn, the main character, and if they are gamers, they will enjoy her gamer and VR adventures. *Booklist*: Praise for Lydia Sherrer: Lydia writes with wit and charm, snappy dialogue, and a warmth
