

THE HUMAN BODY: AN ORIENTATION

Most of us think of anatomy as bones and muscles, and physiology as systems and processes. In reality, these fields are closely intertwined. The human body is a complex system of interconnected parts, each with its own function and purpose. Understanding the human body is not just about knowing the parts, but also about understanding how they work together to keep us alive and healthy.

This course is designed to provide you with a comprehensive understanding of the human body, from the basic structures of anatomy to the complex processes of physiology. You will learn how the body is organized, how it functions, and how it responds to the environment. This knowledge is essential for anyone who wants to understand the human body and its capabilities.
