

A simplified version of a DNA molecule.

Mitosis:

Mitosis is a process of separating a cell into two with identical sets of chromosomes. This occurs during growth, repair, cloning and asexual reproduction.

1. Prophase - the cell duplicates its DNA.
2. Metaphase - the centrioles (duplicated DNA) align themselves along the equator (middle) and send out tubules that connect to the centromere and connect the two strands of chromosomes (condensed DNA).
3. Anaphase - half of the chromosomes are pulled one way and vice versa.
4. Telophase - cell membranes close in and split the cell.

The organisation of cells:

Specialised cells that perform similar functions are grouped together as tissues:

There are many types of tissues:

1. Bones - collection of cells that secrete calcium salts.
2. Muscle - these can be voluntary, involuntary or also cardiac.

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross cultural meta analysis. Written for a primarily academic audience, this book provides a much needed common background for future evolution education research across the globe.
