**Environmental Law** Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law. It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points: country studies from all continents; responses to common problems including air pollution, water management, nature conservation, genetically modified organisms, climate change and energy; chemicals waste; foundational components of environmental law systems including principles, property rights, administrative and judicial organisation, command and control, regulation, market mechanisms, informational techniques and liability mechanisms; and common interactions of environmental protection with the broader public, private and criminal law contexts. The volume brings together the foremost authorities in this field from around the world to provide a concise, self-contained and technically rigorous account of environmental law as a single overall system. **Concentrate Questions and Answers Evidence** Maureen Spencer, John Spencer, 2016 This essential Q & A study and revision guide contains a variety of model answers and plans to give you the confidence to tackle any essay or problem question and give you the skills you need to excel in law exams and coursework assignments. *The Supreme Court of Ghana Law Reports*, 2015 **Legitimate Expectations in the Common Law World** Matthew Groves, Greg Weeks, 2017-01-12 The recognition and enforcement of legitimate expectations by courts has been a striking feature of English law since *R v North and East Devon Health Authority ex parte Coughlan* 2001 3 QB 213. Although the substantive form of legitimate expectation adopted in *Coughlan* was quickly accepted by English courts and received a generally favourable response from public law scholars, the doctrine of that case has largely been rejected in other common law jurisdictions. The central principles of *Coughlan* have been rejected by courts in common law jurisdictions outside the UK for a range of reasons such as incompatibility with local constitutional doctrine or because they mark an undesirable drift towards merits review. The sceptical and critical reception to *Coughlan* outside England is a striking contrast to the reception the case received within the UK. This book provides a detailed scholarly analysis of these issues and considers the doctrine of legitimate expectations both in England and elsewhere in the common law world. Introducing RDA Chris Oliver, 2021-04-06 Since Oliver's guide was first published in 2010, thousands of LIS students, records managers and cataloguers and other library professionals have relied on its clear, plainspoken explanation of RDA (Resource Description and Access) as their first step towards becoming acquainted with the cataloguing standard. Now reflecting the changes to RDA after the completion of the 3R Project, Oliver brings her Special Report up to date. This essential primer concisely explains what RDA is, its basic features and the main factors in its development; describes RDA's relationship to the international standards and models that continue to influence its evolution; provides an overview of the latest developments focusing on the impact of the 3R Project; the results of aligning RDA with IFLA's Library Reference Model (LRM) and the outcomes of internationalization; illustrates how information is organized in the post-3R Toolkit and explains how to navigate through this new structure and discusses how RDA continues to enable improved resource
