Jsc 2014 Finalexam:

Theoretical Modeling of Organohalide Perovskites for Photovoltaic Applications Giacomo Giorgi, Koichi Yamashita, 2017-07-12 Perovskites are a class of recently discovered crystals with a multitude of innovative applications. In particular, a lead role is played by organic inorganic halide perovskites (OIHPs) in solar devices. In 2013, Science and Nature selected perovskite solar cells as one of the biggest scientific breakthroughs of that year. This book provides the first comprehensive account of theoretical aspects of perovskite solar cells starting at an introductory level but covering the latest cutting edge research. Theoretical Modeling of Organohalide Perovskites for Photovoltaic Applications aims to provide a theoretical standpoint on OIHPs and on their photovoltaic applications with particular focus on the issues that are still limiting their usage in solar cells. This book explores the role that organic cations and defects play in the material properties of OIHPs and their effects on the final device, in addition to discussing the electric properties of OIHPs, the environmentally friendly alternatives to the use of lead in their structural and electronic properties, theoretical screening for OIHP-related material for solar-to-energy conversion, and the nature and the behavior of quasiparticles in OIHPs. **Murphy on Evidence** Peter Murphy, Richard Glover, 2017 Murphy on Evidence frames the law in its practical context. The PAP process can completely eradicate the poverty and unemployment across the globe and it can solve the problems of CO₂ associated global warming and the related social cost of carbon problems completely. Four new technologies invented and discovered by the author of this book as a part of developing this comprehensive PAP process, including a brand new technology Semiconductor and Liquid Assisted Photothermal Effect (SLAPE) to generate electricity from sunlight with highest efficiency at lowest expenditure, have also been presented and described in this book for the first time.
