Footprints in Parchment SANDRA SWEENEY SILVER,2013-05-15 Footprints in Parchment Rome Versus Christianity 30 313 AD masterfully tackles the question How did a group of Christians with no homeland and no standing army defeat the juggernaut of ancient Rome Using hundreds of first hand accounts of events Silver guides the reader through the rise and the reach of Imperial Rome to its eventual ruin and rescue by the infant Christian Church Over a three hundred year period Rome killed tens of thousands of Christians in an attempt to eradicate this new religion that it correctly intuited would bring Rome to its knees Tertullian had said in the early 200s The blood of the martyrs is the seed of the church Why did Rome kill all those people just because they believed in a Jewish carpenter from an obscure part of her Empire and why did so many Christians willingly die The martyrs died for the religious freedom to publicly say the words Christianus sum I am a Christian They won that right Rome Versus Christianity leads the reader down the road of Romes decline and Christianitys rise There are many fascinating sights along the way

Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating A.T. Fomenko,2013-04-17 We present certain empirico statistical methods for the analysis of narrative and numerical data extracted from different texts of historical character such as chronicles or annals They are based on several statistical principles worked out by the author and originally reported at the Third International Vilnius Conference on Probability Theory and Mathematical Statistics in 1981 The principal results were published in the papers 15 32 293 299 304 319 and in the book A T Fomenko Methods for Statistical Analysis of Narrative Texts and Applications to Chronology Moscow Univ Press Moscow 1990 in Russian See also Part 1 The methods are applied to the problem of correct dating of the events in ancient and medieval history These results induce conjectures on the redating of some important ancient historical events Generally speaking we might say that the commonly accepted Modern Text book of ancient and medieval European Mediterranean Egyptian and Middle Eastern history is a fibered layered chronicle obtained by gluing together four nearly

identical copies of a shorter original chronicle The other three chronicles are obtained from the original chronicle by redating and renaming the events described in them we rigidly move the original chronicle in its entirety backwards in time by approximately 333 1053 and 1778 years Thus the full Modern Textbook can be reconstructed from its smaller part namely from the original chronicle for the 9 17th cc A D See Appendix 1 Figs 101 104
