LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

1. In this introductory module video, you were asked to name eight lizards with adaptations that allow them to survive in their native habitats. Name four of these lizards.

Geckos, chameleons, iguanas, and anoles.

2. What does having good coloration mean?

Coloration refers to the colors of an organism. It can be used for camouflage, communication, and protection. For example, a chameleon can change its color to match its surroundings.

3. An adaptation is a characteristic of an organism that is inherited. It is a trait that helps an organism survive in its environment. Give an example of an adaptation that a lizard has.

Adaptation: the ability to change color. This is a trait that helps a lizard survive in its environment by allowing it to blend in with its surroundings.

4. Provide one example of a trait that a lizard has that is not an adaptation. (i.e., this trait) would have evolved in a lizard's ancestor.

Example: the ability to move quickly. This is a trait that helps a lizard survive in its environment by allowing it to escape predators.
