A Learning Community of Reflective Teachers Neeraja Raghavan, 2024-02-06 Teachers possess a wealth of untapped wisdom and valuable experience Be it educational policy curriculum development or textbook selection rare are the instances when teachers' views are solicited Traditionally teacher development has been driven by administrators of schools and it often takes the form of a mentor teaching the staff of a school But what happens when teachers across different locations

collaborate and learn together This volume documents such an initiative sparked off by the Covid 19 pandemic which brought people together online It showcases the power of teachers debating discussing and learning from each other Based on an Indian experience this book addresses a range of issues that teachers and educators across the world face encompassing pedagogy classroom management school culture and teacher development A unique story of community building and teacher education this book also contains key outcomes and insights while taking us through their action research projects It showcases a model of teacher development that can be adopted by interested readers anywhere in the world Above all it brings out the crying need for a teacher s voice to be heard for far too long teachers have been mere implementers of decisions taken by policymakers or managements of schools By means of networking communities such as the one described in this book the transformation of teachers going from whispers to resonance is greatly amplified An important intervention in the domain of teacher development this volume will be of great interest to students researchers educators teacher educators and sociologists of education It will also be useful for teacher trainees academicians policymakers schoolteachers curriculum developers teacher training institutes and universities offering teacher education programmes

The Book Buyer ,1872-11 *Masculinities, Sexualities and Child Sexual Abuse* Anne Cossins,2021-08-04 Why is child sexual abuse committed primarily by men and male adolescents unlike other forms of child abuse Is child sex offending rather than being a deviant masculine sexual practice related to normative masculine practices that is practices structured on dynamic and changing relations of power Using a practice based sociological approach the relationship between masculinities sexualities and child sexual abuse is analysed and the power powerlessness theory is developed to explain the predominantly male problem of child sex offending The theory postulates that because the social construction of masculinities involves the construction of dynamic and changing relations of power between men men s lives are characterised by a combination of power and powerlessness The book argues that an offender s experiences of powerlessness as a result of his relationships with other men is the key to understanding child sex offending since sexuality is a key social practice for the alleviation of experiences of powerlessness and for establishing relations of power with other men In particular the theory argues that a man s particular attachment to the link between sexuality and experiences of masculinity and power will be a key factor for

determining how he does sex and whom he chooses as a sexual partner In the final chapter the theory is tested through a re analysis of offender interviews

Rider's International Classification Fremont Rider, 1961 *The American Short-hand Writer* , 1884 The British Trade Journal , 1913 *Towards a Theory of Spacetime Theories* Dennis Lehmkuhl, Gregor Schieman, Erhard Scholz, 2017-01-05 This contributed volume is the result of a July 2010 workshop at the University of Wuppertal Interdisciplinary Centre for Science and Technology Studies which brought together world wide experts from physics philosophy and history in order to address a set of questions first posed in the 1950s How do we compare spacetime theories How do we judge objectively which is the best theory Is there even a unique answer to this question The goal of the workshop and of this book is to contribute to the development of a meta theory of spacetime theories Such a meta theory would reveal insights about specific spacetime theories by distilling their essential similarities and differences deliver a framework for a class of theories that could be helpful as a blueprint to build other meta theories and provide a higher level viewpoint for judging which theory most accurately describes nature But rather than drawing a map in broad strokes the focus is on particularly rich regions in the space of spacetime theories This work will be of interest to physicists as well as philosophers and historians of science working with or interested in General Relativity and or Space Time and Gravitation more generally
