

LOCAL GOVERNMENT AUTONOMY UNDER THE 1999 CONSTITUTION OF NIGERIA: A REALITY OR MYTH

Abstract

Local government autonomy denotes the ability of the local governments to manage local affairs within their areas of jurisdiction under the Constitution a tier of government without unjustifiable encroachment by other tiers of government. Nigerian local governments have gone through series of reforms under the military regime to make them better but without much success. There were rampant cases of interferences on the councils' affairs by state government. For instance, elected local governments were constantly dissolved and replaced by state government's appointed agents. Under the 1999 Constitution, the councils are confronted with myriad of challenges as everything about them is controlled entirely by state governments. In effect, there is currently dearth of development at the grassroots. The masses do not feel the dividends of government by way of social service delivery at the local level. Local government has failed to impact on the lives of rural dwellers and the people are not made to know what governance is all about. Hence, rural urban migration has drastically increased. There are arguments to scrap local governments in the country for their failure to live up to their expectations. Local government is indispensable in the development of the country's grassroots because majority of Nigerians live in the rural areas. This study appraises whether local government autonomy under the 1999 Constitution of Nigeria is a reality or myth. The researcher employed doctrinal methodology in the course of the work. The examination got materials from primary and secondary sources such as statutes, judicial decisions, text books, journal articles, dictionaries, and the internet. The researcher utilized analytical approach in the analysis of data collected and collated. This inquiry found that local government autonomy under the 1999 Constitution of Nigeria is a myth and not real. This research recommends that the 1999 Constitution be amended in order to grant full autonomy to the local government in Nigeria so that it can live up to its expectations as the third tier of government in the country.

Keywords: Autonomy, Local Government, Devolution, Reform, Grassroots, Management, Constitution.

1. Introduction

The local government is established in the entire globe to boost development in the grassroots. It is geared towards devolution of powers to enable the locales to participate in management of their own affairs. It is meant to guide against over concentration of powers at the center; that is the federal government.

Local Government Autonomy Myth Or Reality:

Resource Conflict and Environmental Relations in Africa Kelechi Johnmary Ani, 2023-03-15 The book discusses the failure of many African governments in providing the social needs of the masses thereby placing the citizenry on the desperate quest for economic resources Unfortunately in many African States mineral resources are owned explored and marketed by the machinery of the state The problem arises when the masses begin to challenge state access and ownership of resources that are domiciled within their ancestral land communities and constituencies Often the challenge and resistance to state ownership of resources is generated by communal or group sense of exploitation negligence and widespread poverty in the face of high resource endowment and waste by the government officials Paradoxically in Niger Delta of Nigeria as discussed in the book the state has unleashed unlimited might upon all social groups and agitators thereby leading to the increased act of taking arms by such groups When the informal resource agitators succeed in arming themselves they begin to demand social and environmental justice thereby leading to mass armed conflict between them and the government security agencies Sometimes the confrontation could be between them and other rival local resource actors in the informal sector of their country s economy bearing in mind that the resources within their jurisdiction have become the central determinant of national commonwealth It is at that state of desperado to control access extraction and sale of natural resources in a State by different armed groups that the process of natural resources extraction qualifies as the most visible cause of conflicts and crises around the African continent that is the centrepiece of the book This is quite understandable given that mineral resource is a gift of nature and nature is that phenomenon that every human group and nation claim to represent or believe to represent them

The Risk of Regional Governance Thomas Skuzinski, 2017-09-18 Creating metropolitan regions that are more efficient equitable and sustainable depends on the willingness of local officials to work together across municipal boundaries to solve large scale problems How do these local officials think Why do they only sometimes cooperate What kind of

governance do they choose in the face of persistent problems The Risk of Regional Governance offers a new perspective on these questions Drawing on theory from sociology and anthropology it argues that many of the most important cooperative decisions local officials make those about land use planning and regulation are driven by heuristic biased reasoning driven by cultural values The Risk of Regional Governance builds a sociocultural collective action framework and supports it with rich survey and interview data from hundreds of local elected officials serving in the suburbs of Detroit and Grand Rapids Michigan It is a story of the Rust Belt of how local officials think about their community and the region and most importantly of how we might craft policies that can overcome biases against regional governance **Nigerian Journal of Public**

Understanding Contemporary Security Challenges in Nigeria Ali Arazeem Abdullahi,Fatai A. Aremu,Usman A. Raheem,Abayomi O. Olaseni,2024-09-30 This book explores how the Nigerian state grapples with both internal and external forces that are fueling insecurity in the country For more than a decade Nigeria has been viciously attacked by different clusters of non state armed actors ranging from religious extremists terrorists kidnappers herders bandits secessionists and unknown gunmen While insurgency related deaths have dropped the north east remains the epicenter of insurgency and terrorism This book unpacks the contemporary security challenges in Nigeria Instead of a monolithic analysis of Boko Haram

it discusses other armed groups secessionist agitations maritime security the social context of insecurity the nexus between the proliferation of small arms and light weapons and insecurity the mental health outcomes of insecurity substance abuse and security as well as migration and national security The book is a policy driven research work that speaks directly to policymakers students and other important stakeholders in the security sector in Nigeria and beyond **The Nature of the Japanese State** Brian J.
