**The Urban Rail Development**

**Handbook** Daniel Pulido, Georges Darido, Ramon Munoz-Raskin, Joanna Moody, 2018-09-20 Cities across the globe are looking to develop affordable environmentally friendly and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development. When appropriately planned and properly implemented as part of a larger public transportation network, urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts. High performing urban rail services, when carefully approached as development projects, can help enhance quality of life by giving citizens access to employment opportunities, essential services, urban amenities, and neighboring communities. The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning, implementation, and operations of urban rail projects with a view towards emphasizing the need for early studies and project planning. Making projects more sustainable economically, socially, and environmentally. Improving socioeconomic returns and access to opportunities for users. Maximizing the value of private participation where appropriate. Building capacity within project implementing and managing institutions. This Handbook provides experiential advice to tackle the technical, institutional, and financial challenges faced by decision makers considering urban rail projects. It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international good practices and recommendations that are independent of commercial, financial, political, or other interests. The material presented is intended as an honest broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries. Rather than identify a single approach, this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions, consider the key issues, perform the necessary studies, apply adequate tools, and learn from international good practice all at the right time in the project development process. Public Sector Marketing Communications Volume I Ogechi Adeola, Paul Katuse, Kojo Kakra Twum, 2022-10-03 African nations are seeking ways to build strong institutions that are development oriented and people centred. Extant literature has reported the negative consequences of ineffective government communications with the public. In response, this book, the first of a two volume edited work, focuses on marketing communication themes related to branding, public relations, trade fairs and exhibitions, and public sector communications. Public sector marketing communication plays a crucial role in bridging the gap between society and the government. Building a relationship with the public through appropriate communication tools and platforms is sacrosanct to restoring public sector image and trust. The book supports this effort by sharing conceptual and theoretical research towards the marketisation of Africa's public sector as it strives to become an effective partner with the public it serves. Together with the second volume, which focuses on traditional and digital perspectives, this collection fills an existing information gap that is evident in Africa's public sector. Green Energy Dustin Mulvaney, 2010-05-04 This initial volume in the SAGE Series on Green Society provides an overview of the social and environmental dimensions of our energy system and

might be experienced by cities that pursue private participation in proposed urban bus interventions Using specific examples the authors thoroughly analyze the risks and the specific potential planning stage challenges likely to be encountered and suggest strategies for practitioners to respond to the local contexts and the various alternative solutions This study builds upon international experiences predominantly in Latin America and in PPPs focused on streamlining fleet provision and operation Finally the book helps to identify and define bankable project structures that could respond well to local contexts and minimize risks
