S. Miles, 2014-07-01 Based on three decades of fieldwork throughout the developing world Scars of Partition is the first book to systematically evaluate the long term implications of

French and British styles of colonialism and decolonization for ordinary people throughout the so called Third World It pays particular attention to the contemporary legacies of artificial boundaries superimposed by Britain and France that continue to divide indigenous peoples into separate postcolonial states In so doing it uniquely illustrates how the distinctive stamps of France and Britain continue to mark daily life along and behind these inherited borders in Africa Asia Oceania and the Caribbean

Scars of Partition draws on political science anthropology history and geography to examine six cases of indigenous indentured and enslaved peoples partitioned by colonialism in West Africa West Indies South Pacific Southeast Asia South India and the Indian Ocean William F S Miles demonstrates that sovereign nations throughout the developing world despite basic differences in culture geography and politics still bear the underlying imprint of their colonial pasts Disentangling and appreciating these embedded colonial legacies is critical to achieving full decolonization particularly in their borderlands

Education, Language, and Economics, 2010-01-01 There are two contending

opinions with regard to the seemingly amorphous phenomenon of globalization. Some believe that globalization has brought rapid prosperity to developing countries while others argue that globalization best serves the needs of countries of the developed world. Bringing globalization under the microscope of education, this book illustrates how globalization is producing unprecedented impacts on education and culture through a series of country case studies elaborating on effects of economic and educational policies in the modern globalized world. New emphasis on the interplay between state and education policy initiatives in developed and developing countries also illuminates the direct and indirect impact of globalization in equity and quality driven education reforms with particular focus on the contribution of marketization or privatization to the ongoing commodification of education and curricula presenting dilemmas to both developed and developing countries to provide quality education for all, protect human rights and ensure equity in all realms of human endeavor. This book offers a multiplicity of approaches to education and development and posits that distributional equity and quality education in a globalized world require a strong state and commitment to social justice to counteract growing disparities evident in educational and economic indices. The authors illustrate how respatialization of the contemporary state is rapidly taking shape in concrete institutions to recast the boundaries of the social, political and economic in fundamental ways. Education, Language and Economics: Growing National and Global Dilemmas serves as an ideal introduction to key contemporary debates on politics, culture and the economy.

Serving Library Users from Asia. John Hickok, 2019-06-12. Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g. disabled, Latino seniors, etc.), few books on serving library users of Asian heritage have been written. Thus, the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries, cultures of East, Southeast and South Asia, with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides, both print and online, language helps, with sample library vocabulary, Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries: public, school, and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public, school, and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.
