

# Organelles in Eukaryotic Cells

What are the functions of different organelles in a cell?

## Why?

The cell is the basic unit and building block of all living things. Organisms rely on their cells to perform all necessary functions of life. Certain functions are carried out within different structures of the cell. These structures are called **organelles**.

## Model 1 – How Is a Cell Like a Factory?

| Part of factory                   | Cell organelle             | Function                                                        |
|-----------------------------------|----------------------------|-----------------------------------------------------------------|
| Control room (E)                  | Nucleus                    | Contains and protects genetic material (DNA)                    |
| Factory manager                   | DNA/chromosomes            | Information for making proteins                                 |
| Assembly workers (F)              | Ribosomes                  | Make proteins                                                   |
| Production line (B)               | Endoplasmic reticulum (ER) | Transports and finishes proteins and other biological molecules |
| Custodians (A)                    | Lysosomes                  | help clean up cell (enzymes)                                    |
| Power generators (H)              | Mitochondria               | create ATP energy                                               |
| Shipping department (C)           | Golgi apparatus            | sends things where they need to go                              |
| Factory interior (G)              | Cytoplasm                  | Space for work to be done                                       |
| Items to be shipped               | Vesicles                   | Cellular package containing products such as protein            |
| Warehouse for storage of products | Vacuole                    | storage                                                         |
| Loading dock                      | Pores/gated channels       | Points of entry and exit for materials                          |
| Security fence (D)                | Cell membrane              | controls what goes in and out of the cells                      |
