Case Studies in the Virtual Physical Chemistry Laboratory Anthony J. Duben, 2024-04-22 This textbook provides a unique instructional resource in experimental Physical Chemistry with case studies based on data taken from the scientific literature. Platform independent software that generates individualized data sets for student practice and assessment is included. Case Studies in the Virtual Physical Laboratory can be used to Create online virtual laboratory courses in Physical Chemistry. Supplement instruction in the lecture hall. Complement hands on projects in face to face laboratory courses. The case studies cover states of matter, thermochemistry, phase equilibria, reaction equilibria, chemical kinetics, electrolyte solutions and activity coefficients. They are written to be self contained to give flexibility in the choice of projects. The pedagogical approach in each case study is to use the given data in direct instruction followed by the analysis of the synthetic data as individualized tasks. Only open source software tools are needed to analyze data. Each case study contains a thorough discussion of the theoretical principles underlying the experiment and data, the character of the data to be analyzed and methods appropriate for the analysis of the data. The accompanying software has been written to allow the production of many data sets without risking duplication yet the synthetic data can be regenerated if the files are lost or become corrupted. Software programs were written in Fortran 95 and are distributed as a suite of executable programs for Intel based computers running Windows, MacOS or Linux. This book will be of particular interest and usefulness to students and instructors in upper division undergraduate physical chemistry courses. *PageMaker 6.5 for Macintosh* Ted Alspach, 1997 Books in the popular Visual Quickstart Guide series use a format in which illustrations predominate to provide a fast simple guide to help readers get up and running with a new program. **Data Driven Guide to the Analysis of X-ray**

Photoelectron Spectra using RxpsG Giorgio Speranza, 2023-11-23 This book provides a theoretical background to X ray photoelectron spectroscopy (XPS) and a practical guide to the analysis of the XPS spectra using the RxpsG software, a powerful tool for XPS analysis. Although there are several publications and books illustrating the theory behind XPS and the origin of the spectral features, this book provides an additional practical introduction to the use of RxpsG. It illustrates how to use the RxpsG software to perform specific key operations with figures and examples which readers can reproduce themselves. The book contains a list of theoretical sections explaining the appearance of the various spectral features: core lines, Auger components, valence bands, loss features etc. They are accompanied by practical steps so readers can learn how to analyze specific spectral features using the various functions of the RxpsG software. This book is a useful guide for researchers in physics, chemistry and material science who are looking to begin using XPS, in addition to experienced researchers who want to learn how to use RxpsG. In the digital format, the spectral data and step by step indications are provided to reproduce the examples given in the textbook. RxpsG is a free software for the spectral analysis. Readers can find the installation information and download the package from <https://github.com/GSperanza> website. RxpsG was developed mainly by Giorgio Speranza with

the help of his colleague dr Roberto Canteri working at Fondazione Bruno Kessler Key Features Simplifies the use of RxpsG how it works and its applications Demonstrates RxpsG using a reproduction of the graphical interface of RxpsG showing the steps needed to perform a specific task and the effect on the XPS spectra Accessible to readers without any prior experience using the RxpsG software Giorgio Speranza is Senior Researcher at Fondazione Bruno Kessler Trento Italy Associate Member of the Italian National Council of Research and Associate Member of the Department of Industrial Engineering at the University of Trento Italy
