### **Historicizing Secular-Religious**

**Demarcations** Monika Wohlrab-Sahr, Daniel Witte, Christoph Kleine, 2024-07-01 This volume aims to revitalize the exchange between sociological differentiation theory and the sociology of religion which previously held center stage among the sociological classics It brings together contributions from different disciplines as well as various forms of regional and historical expertise which are indispensable in forming a globally oriented sociological perspective today Secularization is understood as a process of boundary demarcation that is as the enactment of semantic practical and institutional distinctions between religion and other spheres of activity and knowledge These distinctions may emerge from within the religious field itself or may be absorbed into the field having originally emerged elsewhere They may even be directly imposed upon religion by external forces The volume is therefore based on the premise that societal differentiation and secularity as a

specific expression of it is a widespread structural feature that nonetheless takes on various forms depending on its historical and cultural context In order to make this diversity visible the volume adopts a global comparative perspective and examines historical distinctions and differentiations in the West and beyond By examining different forms and modes of secularity in statu nascendi the volume contributes to developing a better understanding of the diversity of secularities even of those found in the present day in terms of their historicity and their specific path dependencies With this shift in perspective this special volume initiates a global and historical turn in the theory of differentiation as well as in the study of secularity

The Einsteinian Revolution Hanoeh Gutfreund, Jürgen Renn, 2025-08-19 How the Einsteinian revolution can be understood as the result of a long term evolution of science The revolution that emerged from Albert Einstein's work in the early twentieth century transformed our understanding of space time motion gravity matter and radiation Beginning with Einstein's miracle year of 1905 and continuing through his development of the theory of general relativity Einstein spurred a revolution that continues to reverberate in modern day physics In The Einsteinian Revolution Hanoeh Gutfreund and Jürgen Renn trace the century long transformation of classical physics and argue that the revolution begun by Einstein was in fact the result of a long term evolution Describing the origins and context of Einstein's innovative research Gutfreund and Renn work to dispel the popular myth of Einstein as a lone genius who brought about a revolution in physics through the power of his own pure thought We can only understand the birth of modern physics they say if we understand the long history of the evolution of knowledge Gutfreund and Renn outline the essential structures of the knowledge system of classical physics on which Einstein drew Examining Einstein's discoveries from 1905 onward they describe the process by which new concepts arose and the basis of modern physics emerged These transformations continued eventually resulting in the establishment of quantum physics and general relativity as the two major conceptual frameworks of modern physics and its two unreconciled theoretical approaches Gutfreund and Renn note that Einstein was dissatisfied with this conceptual dichotomy and began a search for a unified understanding of physics a quest that continued for the rest of his life
