Monsters, Monstrosities, and the Monstrous in Culture and Society Diego Compagna, Stefanie Steinhart, 2020-01-28 Existing research on monsters acknowledges the deep impact monsters have especially on Politics Gender Life Sciences Aesthetics and Philosophy From Sigmund Freud s essay The Uncanny to Scott Poole s Monsters in America previous studies offer detailed insights about uncanny and immoral monsters However our anthology wants to overcome these restrictions by bringing together multidisciplinary authors with very different approaches to monsters and setting up variety and increasing diversification of thought as guiding patterns Existing research hints that monsters are embedded in social and scientific exclusionary relationships but very seldom copes with them in detail Erving Goffman s doesn t explicitly talk about monsters in his book Stigma but his study is an exceptional case which shows that monsters are stigmatized by society because of their deviations from norms but they can form groups with fellow monsters and develop techniques for handling their stigma Our book is to be understood as a complement and a further development of previous studies The essays of our anthology pay attention to mechanisms of inequality and exclusion concerning specific historical and present monsters based on their research materials within their specific frameworks in order to create engaging constructive critical and diverse approaches to monsters even utopian visions of a future of societies shared by monsters Our book proposes the usual view that humans look in a horrified way at monsters but adds that monsters can look in a critical and even likewise frightened way at the very societies which stigmatize them

Manuel de psychologie des handicaps Jean-Adolphe Rondal, 2001 La problématique du handicap sous ses diverses formes est bien reconnue et posée

aujourd'hui dans nos sociétés. Beaucoup d'efforts ont été et sont consentis pour créer des structures susceptibles de répondre aux besoins particuliers des enfants, adolescents et adultes handicapés. Simultanément, on cherche de plus en plus à intégrer ces personnes dans le tissu social habituel, qu'il s'agisse des milieux scolaires, sociaux ou professionnels. Si une partie du chemin a été parcourue, il reste encore beaucoup à faire en matière de dépistage et d'évaluation précise et notamment de développement de nombreuses formes et variétés de handicap. Malgré d'évidents progrès au cours de ces dernières années, les procédures d'intervention rééducative précoce et continue au long de l'existence restent insuffisamment efficaces faute de recherches et de connaissances fondamentales suffisantes. On a peine à toucher jusqu'ici aux difficiles problèmes portant sur la vie des adultes handicapés, particulièrement pour ce qui est des handicaps lourds voire des multihandicaps. Leur intégration sociale et professionnelle reste délicate, leur vie affective et sexuelle souvent peu prise en considération. Enfin, le vieillissement de ces personnes compte tenu des gains appréciables de longévité commence seulement à faire l'objet de recherches et d'adaptations concrètes. L'ouvrage présente, discute et met en perspective l'ensemble des problématiques concernant les diverses formes de handicap. Il est en tant que synthèse spécialisée unique en son genre dans la littérature francophone. Les textes ont été préparés par une équipe d'experts provenant des Universités de Liège, Mons, Louvain, Namur, Genève, Besançon, Poitiers, Montréal et Sherbrooke, ainsi que de quelques Centres spécialisés non universitaires.
