Johnson,Bonnie Johnson,2006 High Stakes is a critical ethnography of an underfunded public elementary school in this era of accountability and high stakes testing The book was written during the year the authors served as third and fourth grade teachers and it juxtaposes the experiences of mostly minority children of poverty and their teachers with an examination of high stakes testing policies and the loss of a comprehensive education to political dictates Still Not Equal M. Christopher Brown,2007 Still Not Equal Expanding Educational Opportunity in Society addresses the successes and failures of Brown v Board of Education and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora The educational political and social influence resulting from Brown the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color Notwithstanding the obstacles barriers and enablers of educational occupational and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning The pursuit of educational

access attendance and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines

Beabout,Joseph L. Boselovic,2015-07-22 With 2015 marking the 10th commemoration of Hurricane Katrina education reform in New Orleans continues to garner substantial local national and international attention Advocates and critics alike have continued to cite test scores new school providers and different theories of governance in making multiple arguments for and against how contemporary education policy is shaping public education and its role in the rebuilding of the city Rather than trying to provide a single unified account of education reform in New Orleans the chapters in this volume provide multiple

ways of approaching some of the most significant questions around school choice and educational equity that have arisen in the years since Katrina. This collection of research articles, essays, and journalistic accounts of education reform in New Orleans collectively argues that the extreme makeover of the city's public schools toward a new market-based model was shaped by many local, historically specific conditions. In consequence, while the city's schools have been both heralded as a model for other cities and derided as a lesson in the limits of market-based reform, the experience of education reform that has taken place in the city and its impacts on the lives of students, families, and educators could have happened only in New Orleans.
