Implementation Science in Nursing
 Linda Roussel, Patricia Thomas, 2024-06-01

A timely resource that shows faculty, students, and clinicians how to bring about and sustain change.

Implementation Science in Nursing: A Framework for Education and Practice provides theoretical information and practical application for evidence-based practice (EBP) in health care. The most challenging but crucial part of EBP is implementation, where the practice change is piloted, evaluated, integrated, and sustained.

Implementation Science in Nursing: A Framework for Education and Practice focuses on the implementation process, which is the study of methods and strategies that promote the methodical uptake of research findings and EBPs into routine practices to ultimately improve patient care, quality, safety, and outcomes.

Drs. Linda A. Roussel and Patricia L. Thomas have combined both didactic teaching methods with real-life exemplars in the text to help readers learn the elements of implementation science and its application. Other important features include:

- Excellent exemplars and sample assignments for educators.
- In-depth discussions on implementation science theories, models, and frameworks applied to real-life scenarios.
- Thorough explanations of evidence-based practice (EBP), quality improvement (QI), implementation science (IS), and dissemination science (DS).
- The latest literature and thinking on implementation science.

With **Implementation Science in Nursing: A Framework for Education and Practice**, nursing professionals and students in Doctor of Nursing Practice programs will learn the tools, techniques, and strategies used to advance quality initiatives and improve patient and population health.
