have been numerous events in the past and they will continue to be a threat to humanity even more so today when the coastal zone is occupied by so much more human activity and many more people. Therefore tsunamis pose a very serious threat to humanity. The only way for us to face this threat is by increased knowledge so that we can meet future events by efficient warning systems and aid organizations. This book offers extensive and new information on tsunamis: their origin, history, effects, monitoring, hazards assessment, and proposed handling with respect to precaution. Only through knowledge do we know how to behave in a wise manner. This book should be a well of tsunami knowledge for a long time, we hope.

This book is a printed edition of the Special Issue UAV or Drones for Remote Sensing Applications that was published in *Sensors*. 3D Surface Reconstruction Francesco Bellocchio, N. Alberto Borghese, Stefano Ferrari, Vincenzo Piuri, 2012-10-28. *3D Surface Reconstruction: Multi Scale Hierarchical Approaches* presents methods to model 3D objects in an incremental way so as to capture more finer details at each step. The configuration of the model parameters, the rationale, and solutions are described and discussed in detail so the reader has a strong understanding of the methodology. Modeling starts from data captured by 3D digitizers and makes the process even more clear and engaging. Innovative approaches based on two popular machine learning paradigms, namely Radial Basis Functions and the Support Vector Machines, are also introduced. These paradigms are innovatively extended to a multi-scale incremental structure based on a hierarchical scheme. The resulting approaches allow readers to achieve high accuracy with limited computational complexity and makes the approaches appropriate for online real-time operation. Applications can be found in any domain in which regression is required. *3D Surface Reconstruction: Multi Scale Hierarchical Approaches* is designed as a secondary text book or reference for advanced level students and researchers in computer science. This book also targets practitioners working in computer vision or machine learning related fields. Laser Scanning Belén Riveiro, Roderik Lindenbergh, 2019-10-18.
