L. Briant, 2013-10-22 Treatise on Materials Science and Technology Volume 25 Embrittlement of Engineering Alloys is an 11 chapter text that describes some situations that produce premature failure of several engineering alloys including steels and nickel and aluminum base alloys Chapters 1 to 3 consider situations where improper alloy composition processing and or heat treatment can lead to a degradation of mechanical properties even in the absence of an aggressive environment or an elevated temperature Chapters 4 and 5 examine the effect of elevated temperatures on the mechanical properties of both ferrous and nonferrous alloys Chapters 6 and 7 discuss the effects of corrosive environments on both stressed and unstressed materials In these environments anodic dissolution is the primary step that leads to failure Chapters 8 to 10 deal with the effects of aggressive environments that lead to enhanced

decohesion or embrittlement of the metal such as hydrogen liquid metal and irradiation induced embrittlement Chapter 11 looks into the embrittlement phenomena occurring during welding one of the most common processing conditions to which a material could be subjected This book will prove useful to materials scientists and researchers **Fiber Fracture** M. Elices, J. Llorca, 2002-11-15 The idea for this book came out of the EURESCO Conference on High Performance Fibers Euroconference on Fiber Fracture in 2000 Many of the books that are currently available look at different aspects of fiber processing properties or applications but none are focussed on the fracture behaviour of fibers This book presents the mechanisms and models of fiber fracture currently available for both natural and synthetic fibers and it is expected that increasingly there will be cross fertilization between the fields opening new frontiers in academic research and more competitive products for industry It covers the following areas of fiber fracture ceramic fibers glass fibers carbon fibers metallic fibers and thin wires polymeric fibers and carbon nanotubes **Mechanics of Crack Growth** National Symposium on Fracture Mechanics (8th : 1974 : Brown University), 1976
