strategies of cooperation and competition at biological scales ranging from individual cells to entire species It captures the way the genome works in cancer cells and Neanderthals in sexual reproduction and the origin of life always underscoring one critical point that only by putting the interactions among genes at center stage can we appreciate the logic of life The Inflamed Feeling Mats Lekander,2022 In The Inflamed Feeling Mats Lekander explores the science behind how you perceive your own health using visual illusions personal experiences placebo hypochondriacs and historical anecdotes Placed against a backdrop of the latest psychoneuroimmunology he explores why you might feel healthy or why you might feel sick

betrayal lies mis representation and toxic relationships at a physical emotional personal and spiritual levels The intention purpose and significance are of electromagnetic nature the resulting coherence and congruency allows for the collapse of the electromagnetic wave function giving way to the formation of vortices via the generation of gravitational waves followed by scalar waves This is possible because of the angular momentum generated by spinning energy
