Domesticating Geopolitics Sean Carter,Tara Woodyer,2023-09-26 This book explores the ways in which the study of the domestic and the international far from being separate spheres are in fact woven together in multiple ways The chapters in this volume seek to question this traditional domestic international binary and approach their entanglement through a range of different empirical settings and methodological approaches Inspired by a recent turn towards recognising the importance of the home the intimate and the everyday in the construction of geopolitical worlds this book captures a broad range of agents practices objects performativities and discourses that contribute to how geopolitics is rendered familiar sanitised embodied and enacted and the ways in which the home and the traditional terrain of the geopolitical the international sphere are in fact folded into each other in multiple ways Domesticating Geopolitics will be of great use to students and researchers interested in geography and politics including popular geopolitics and human geography This book was originally published as a special issue of Geopolitics

[The Geopolitics of Cyberspace](#) Shaun Riordan,2019-09-02 In The Geopolitics of Cyberspace A Diplomatic Perspective Riordan explores the extent to which the key concepts of classical and critical Geopolitics can be applied to

cyberspace and how they might explain the behaviour of key state and non state actors Case studies seek to apply both kinds of geopolitical analysis to the US Russia China the EU and internet companies discussing what it can tell us about their past and future behaviour Riordan then explores the implications for both the theory and especially the practice of diplomacy in relationship to cyberspace He argues that foreign ministries and diplomatic services need to reform both their culture and structures to engage successfully with the challenges posed by cyberspace Underlying the article is an attempt to rescue both diplomacy and geopolitics from popular usages that risk emptying both concepts of meaning *ICSSSED 2020*

Gender and Fair Assessment Warren W. Willingham,Nancy S. Cole,2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic

of historical interest and has received much attention in recent years. Because of this increased interest, there is a great deal of new research and data available. The purpose of the study presented in this volume was to review this new information with two objectives in mind: to clarify patterns of gender difference and similarity in test performance and related achievements, and to see what implications those findings might have for fair assessment and, as a corollary, to examine the assessment process as a possible source of gender differences. This study is interested in tests used in education to assess developed knowledge and skill. In order to gain a broader view of gender similarity and difference, the contributors looked at other types of measures and other characteristics of young women and men. Their hope is to contribute to a firmer basis for insuring fairness in tests, an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience.
