Difficult Questions Have Easy Answers Atina Hseham, 2023-12-06 An inquiry made to obtain any information is known as an interrogation While asking the person tries to get an answer that allows him to satisfy his doubts The interviewers often ask simple questions in a very twisted fashion to confuse the candidates Difficult questions answers reflect the knowledge of the giver as well as his overall personality For example Which is heavier a kilogram of feathers or 1000 grams of lead Solution Both the weights are equal And What happened in Kolkata yesterday from 8 to 9 o'clock Solution An hour had passed These questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not It can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices In some cases the answer is found in the question itself but in secret Tricky questions are also used for fun or as a mental activity of logical practice Like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why Solution Because the truck driver was on foot He shaves all day but still has a beard who is he Solution Barber Some months have thirty days and others thirty one but how many months have twenty eight Solution Every

month has at least twenty eight days Which object becomes wet When it dries Solution Towel How do you draw a square with three lines Solution draw the square first and then draw three lines inside the square Thus an answer to a tricky question can lead to confusion due to the confusion generated question These types of questions are very specific to the areas in which people s knowledge or behavior is evaluated Generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality However they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying I know In this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations

Attacking the Standardized Exam Ronald S. Thompson, 2011-09 I have spent the better part of the last 53 years taking well over a thousand multiple choice tests As a teenager I struggled through high school Armed with an average IQ and some fairly significant learning disabilities I barely graduating with a 1.4 grade point average However I was smart enough to figure out early on that much of academics and that achieving success in academics had far more to do with the ability to master multiple choice tests than raw intellect From there I began a 35 year study on the art and science of passing mastering and scoring high on multiple choice tests Despite a very substandard high school GPA I scored high enough on the SAT and the ACT to be accepted to the University of Michigan one of the top academic institutions in the Country Upon graduation from college I accepted a commission as an officer in the United States Marine Corps As a Marine Officer I completed dozens of military and civilian schools including a Masters Degree from Boston University and a Juris Doctor Degree from the University of Detroit School of Law In fact I earned a full ride military scholarship to law school based primarily on the fact I scored so highly on the Law School Aptitude Test 98th percentile Upon completion of law school I passed the Michigan Bar exam on the first attempt scoring 149 points on the multistate the multiple choice portion of the exam which was one question away from automatic passage at 150 they examiners do not need to grade the essay portion I have also taken and applied many of the Marine Corps concepts of discipline and mental toughness to the art of preparing for taking and passing multiple choice tests Resigning my commission and leaving the Marine Corps in 1990 I continued both my education as well as honing my test taking skills I currently hold 12 professional licenses and 5 professional designations which required me to pass several comprehensive and difficult multiple choice examinations I have also attended dozens of professional test preparation courses From those courses I have cherry picked all of the valuable lessons and test taking tips and have included those in this book One of the professional licenses I hold is a paramedic license As a paramedic I have gained a much greater understanding of the anatomy and physiology of test taking Test taking is all about the central nervous system which of course includes the brain However as I explain in this book it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain Accordingly I have also applied many of those principals in this book
