Grade 9 Eqaio Practice Questions:

Between Caring & Counting Lindsay Kerr, 2006-01-01 One of the key planks of conservative Ontario premier Mike Harris's 1990s platform was education reform. Amid a sea of official reports, policy documents, and expert opinions on education, however, the voices of actual classroom teachers were difficult to find. This omission is redressed in Lindsay Kerr's *Between Caring & Counting*. Through a focus group of present-day secondary school teachers in Toronto, Kerr delivers a passionate account of the unassailably negative changes affecting secondary education and teachers' work. From a critical feminist perspective and using institutional ethnography, Kerr situates the problem in education squarely as a conflict between an accounting logic and an ethic of care at the centre of education practice. She exposes paradoxes inherent in education reform, such as the increase of government control at the same time that government funding for education decreases. She also connects educational restructuring to changes in the power relations of gender, class, and race across the public education system. These local changes, she finds, do not reflect sound pedagogy but the imperatives of neoliberal globalization. Counteracting despair with hope, Kerr explores self-reflexive suggestions for teacher educators to exercise agency in their lives and to continue to work toward a just and equitable public education system.

Perspectives on Transitions in Schooling and Instructional Practice Susan E. Elliott-Johns, Daniel H. Jarvis, 2013-12-06 *Perspectives on Transitions in Schooling and Instructional Practice* examines student transitions between major levels of schooling, teacher transitions in instructional practice, and the intersection of these two significant themes in education research. Twenty-six leading international experts offer meaningful insights on current pedagogical practices, obstacles to effective transitions, and proven strategies for stakeholders involved in supporting students in transition. The book is divided into four sections representing the four main transitions in formal schooling: Early Years (Home, Pre-school, and Kindergarten) to Early Elementary (Grades 1-3), Early Elementary to Late Elementary (Grades 4-8), Late Elementary to Secondary (Grades 9-12), and Secondary to Post-Secondary (College and University). A coda draws together overarching themes from throughout the text to provide recommendations and a visual model that captures their interactions. Combining theoretical approaches with practical examples of school-based initiatives, this book will appeal to those involved in supporting either the student experience, both academically and emotionally, or teacher professional learning and growth.

Decolonizing Educational Assessment Ardavan Eizadirad, 2019-09-06 This book examines the history of standardized testing in Ontario, leading to the current context and its impact on racialized identities, particularly on Grade 3 students, parents, and educators. Using a theoretical argument supplemented with statistical trends, the author illuminates how EQAO tests are culturally and racially biased and promote a Eurocentric curriculum and way of life privileging white students and those from higher socio-economic status. This book spurs readers to further question the use of EQAO standardized testing and challenges us to consider alternative models which serve the needs of all students.

Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer

Holm,Egan J Chernoff,2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step

High-Stakes Testing in Education Theo J.H.M Eggen,Gordon Stobart,2015-10-14 High stakes educational testing is a global phenomenon which is increasing in both scale and importance Assessments are high stakes when there are serious consequences for one or more stakeholders Historically tests have largely been used for selection or for providing a licence to practise making them high stakes for the test takers Testing is now also used for the purposes of improving standards of teaching and learning and of holding schools accountable for their students results These tests then become high stakes for teachers and schools especially when they have to meet externally imposed targets More recent has been the emergence of international comparative testing which has become high stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries In this book we draw on research which examines each of these uses of high stakes testing The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise To underline the international appeal of high stakes testing the studies are drawn from Australia Africa the Caribbean Europe former Soviet republics and North America Collectively they illustrate the power of high stakes assessment in shaping for better or for worse policy making and schooling This book was originally published as a special issue of Assessment in Education Principles Policy Practice

Testing Mathematics? Or Testing English? The Education Quality Accountability Office (EQAO) Grade 9 Mathematics Assessment for English Language Learners Queenie Chi Wah Wong,2012 Research on English Language Learners ELL test performance in relation to their language use at home and attitudes towards mathematics have rarely been investigated This study examines the effects of different test formats and constructs learner characteristics and attitudes towards mathematics on ELLs performance in the Education Quality Accountability Office EQAO Grade 9 mathematics test The participants include a total of 2867 ELLs in Grade 9 who participated in the EQAO Grade 9 mathematics test 1887 from the academic course and 980 from the applied course The overall results of the study supported the following conclusions First ELLs tend to score better in Multiple Choice Questions MCQ over Open Response Questions ORQ and language use at home has interaction effects on their performances on various test formats and constructs Secondly significant interactions occurred between language use at home and ELLs performance of test formats and constructs In addition ELLs who speak another language only another language scored higher in performance in both test formats and constructs than ELLs who spoke only English at home From the ELLs questionnaire responses at both the academic and applied levels two learner characteristics were derived from the section of the questionnaire measuring

attitudes towards mathematics perceived mathematics competency and mathematics interest The questionnaire also revealed that ELLs in the academic level viewed mathematics in separate constructs i e numerical and spatial mathematics whereas ELLs in the applied level viewed mathematics as a whole By extracting from learner characteristics perceived mathematics competency was found to be the significant predictor for mathematics test performance of ELLs in the academic and applied levels Moreover perceived numerical and spatial mathematics ease are significant predictors for mathematics test performance in the academic level On the other hand perceived mathematics ease was found to be a significant predictor for the applied level Results are discussed in relation to second language development mathematics teaching and learning and cultural differences Limitations of the present study were presented where implications for research test development and practice are suggested for future research
