The Debt Trap Josh Mitchell, 2021-08-03 AN NPR AND NEW YORK POST BEST BOOK OF 2021 From acclaimed Wall Street Journal reporter Josh Mitchell the devastating account The Wall Street Journal of student debt in America In 1981 a new executive at Sallie Mae took home the company's financial documents to review You've got to be shitting me he later told the company's CEO This place is a gold mine Over the next four decades the student loan industry that Sallie Mae and Congress created blew up into a crisis that would submerge a generation of Americans into 1.5 trillion in student debt In *The Debt Trap* Wall Street Journal reporter Josh Mitchell tells the vivid and compelling Chicago Tribune untold story of the scandals scams predatory actors and government malpractice that have created the behemoth that one of its original architects called a monster As he charts the jaw dropping Jeffrey Selinger New York Times bestselling author of *Who Gets in and Why* seventy year history of student debt in America Mitchell never loses sight of the countless student victims ensnared by an exploitative system that depends on their debt Mitchell also draws alarming parallels to the housing crisis in the late 2000s showing the catastrophic consequences student debt has had on families and the nation's future Mitchell's character driven narrative is necessary reading The New York Times for anyone wanting to understand the central economic issue of our day

The Value of Social, Behavioral, and Economic Sciences to National Priorities National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on the Value of Social, Behavioral, and Economic Sciences to National Priorities, 2017-08-12 Nearly every major challenge the

United States faces from alleviating unemployment to protecting itself from terrorism requires understanding the causes and consequences of people's behavior. Even societal challenges that at first glance appear to be issues only of medicine or engineering or computer science have social and behavioral components. Having a fundamental understanding of how people and societies behave, why they respond the way they do, what they find important, what they believe or value, and what and how they think about others is critical for the country's well-being in today's shrinking global world. The diverse disciplines of the social, behavioral, and economic (SBE) sciences—anthropology, archaeology, demography, economics, geography, linguistics, neuroscience, political science, psychology, sociology, and statistics—all produce fundamental knowledge, methods, and tools that provide a greater understanding of people and how they live.

The Value of Social, Behavioral, and Economic Sciences to National Priorities evaluates whether the federal government should fund SBE research at the National Science Foundation (NSF) and specifically whether SBE research furthers the mission of the NSF to advance national priorities in the areas of health, prosperity, and welfare; national defense; and progress in science. Advances in the missions of other federal agencies and advances in business and industry, and to provide examples of such research. This report identifies priorities for NSF investment in the SBE sciences and important considerations for the NSF for strategic planning.

Assessing Contexts of Learning Susanne Kuger, Eckhard Klieme, Nina Jude, David Kaplan, 2016-12-05. This volume brings together educational effectiveness research and international large-scale assessments, demonstrating how the two fields can be applied to inspire and improve each other and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries. The book's initial chapters introduce and summarize recent discussions and developments in the conceptualization, implementation, and evaluation of international large-scale context assessments and provide an outlook on possible future developments. Subsequently, three thematic sections—Student Background, Outcomes of Education Beyond Achievement, and Learning in Schools—each present a series of chapters that provide the conceptual background for a wide range of important topics in education research, policy, and practice. Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice. These frameworks were used to develop interesting and relevant indicators that may be used for

meaningful reporting from international assessments other cross cultural research or national studies Using the example of one particular survey the Programme for International Student Assessment PISA 2015 this volume links all theoretical considerations to fully developed questionnaire material that was field trailed and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools The primary purposes of this book are to inform readers about how education effectiveness research and international large scale assessments are already interacting to inform research and policymaking to identify areas where a closer collaboration of both fields or input from other areas could further improve this work to provide sound theoretical frameworks for future work in both fields and finally to relate these theoretical debates to currently available and evaluated material for future context assessments
