Warnock 40 Years On: The Development of Special Educational Needs Since the Warnock Report and Implications for the Future Geoff Lindsay, Julie Dockrell, Klaus Wedell, 2020-03-18 Microbial Ecology in Reservoirs and Lakes Haihan Zhang, Raju Sekar, Petra M. Shadow Education in the Middle East Mark Bray, Anas Hajar, 2022-08-08 This volume offers insights into the role of private supplementary tutoring in the Middle East and its far reaching implications for social structures and mainstream education Around the world increasing numbers of children receive private tutoring to supplement their schooling In much of the academic literature this is called shadow education because the content of tutoring commonly mimics that of schooling as the curriculum changes in the schools so it changes in the shadow While much research and policy attention has focused on private tutoring in East Asia and some other world regions less attention has been given to the topic in the Middle East Drawing on both Arabic language and English language literature this study commences with the global picture before comparing patterns within and among 12 Arabic speaking countries of the Middle East It presents the educational and cultural commonalities amongst these countries examines the drivers of demand and supply of shadow education and considers the dynamics of tutoring and how it impacts on education in schools In addition to its pertinence within the Middle East itself the book will be of considerable interest to academics and education policy makers broadly concerned with changing roles of the state and private sectors in education The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Anesthetic-Induced Neurotoxicity and Neurocognitive Impairment of Vulnerable Brains* Yingwei Wang, Zhongcong Xie, Jiaqiang Zhang, 2023-11-02 Vaginal microecological disorder and gynecological diseases Zhangran Chen, Lei Cheng, Qingping Liao, Tingtao Chen, Ruonan Wu, 2023-11-06 *Marker-Assisted Selection (MAS) in Crop Plants, volume II* Ting Peng, Baohua Wang, Muhammad Kashif Riaz Khan, Peng Chee, 2024-06-13 Global climate change reductions in arable land and food security demands that plant breeding will continue to play an imperative role in feeding 9 billion people sustainably by 2050 In order to face this challenge modern plant breeding will necessitate the adoption of new technologies and practices to boost production of cultivated plants by capturing or generating more favorable genetic diversity In crop plants the majority of agronomically important traits are quantitatively inherited controlled by multiple genes each with a small effect quantitative trait loci QTLs The most common approach to pre breeding is to use genetic mapping to identify QTLs for key phenotypic variation followed by introgressing those QTLs into the elite gene pool with marker assisted

selection MAS which can enhance the selection criteria of phenotypes comparing to conventional breeding with the selection of genes As the cost of genotyping continues to decline the use of genotyping by sequencing GBS technologies or whole genome re sequencing coupled with the release of the genome sequences of plant species have permitted the development of dense arrays of single nucleotide polymorphisms SNPs covering the entire genome which have in turn paved the way to genome wide association studies GWAS Meanwhile fine mapping guided by genome sequences of many plant species have facilitated the exploration of functional genes in addition pan genomes constructed from various available resources such as the reference sequence and its variants raw reads and haplotype reference panels provide a new perspective on QTL locations and potential molecular targets for plant breeding Similarly new approaches to marker trait association analyses such as quantitative trait locus sequencing QTL seq and quantitative trait gene sequencing QTG seq that are based on bulked segregant analysis BSA and whole genome resequencing will help accelerate QTL fine mapping and identification of the causal genes In conclusion the tools and strategies for MAS in modern plant breeding have been expanding in recent years By embracing a broad array of conventional and new molecular techniques modern plant breeding has a bright future in delivering new crop cultivars to keep our food fiber and biobased economy diverse and safe **Biomarkers: Precision**

Nutrition in Chronic Diseases Yulong Li, Shuang Song, Zhenjun Zhu, 2023-08-15 Chronic diseases such as obesity diabetes and cardiovascular disease are major causes of morbidity and mortality worldwide with increasing prevalence in all age groups genders and ethnicities Emerging evidence suggests that precision nutrition plays a pivotal role in the prevention and management of chronic diseases and has been recognized as a key focus for the next ten years of health research Currently one of the major challenges in precision nutrition is the valid and reliable assessment of foods and nutrients intake especially whole foods e g fermented foods and macromolecules e g polysaccharides as well as their impact on host health and disease Strong evidence has supported that the biomarkers e g metabolites as an intermediate bridge can effectively link precision nutrition and chronic diseases which can contribute to objectively assessing food consumption and precisely determining the biological effects of complex foods ingredients However still we are at the very beginning to understand how precision nutrition regulates biomarkers to prevent chronic diseases with individual differences The molecular mechanisms of key biomarkers in chronic diseases have not been fully elucidated and extensive studies are crucially warranted
