

Ozymandias by Percy Bysshe Shelley

Overview of the Poem and Context:

Written in 1817 after Shelley saw Egyptian statues retrieved from the desert in the British Museum. Shelley was a Romantic poet, writing about the power of nature and the depth of human emotion. The narrator meets a traveller who tells him about a statue standing in the middle of the desert in Egypt. The statue is of a king and the inscription brags about how powerful he was when alive. The statue has now tumbled down and is half buried in the sand.

Key Language Features:

The language is often powerful and angry, showing the aggression of the king/pharaoh: 'voice of cold command'. Irony is used to show how the king's bold words mean nothing in the face of nature - the inscription is juxtaposed against the 'decay of the colossal wreck' and the barrenness of the desert.

Key Quotations:

'a shattered visage', 'voice of cold command', 'colossal wreck, boundless and bare'

Themes:

Power of nature/
humans, Pride.

Potential Links:

The power of nature can also be found in 'The Prelude', 'Exposure' and 'Storm on the Island'. Pride is also expressed in Browning's 'My Last Duchess'.

Key Structural Features:

The poem is a sonnet in structure. It has a turning point (volta) at line 9. The enormity of the desert rounds off the poem, showcasing the power of nature.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of

researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
