Behavioral addictions: Emerging science Andreas Chatzittofis, Hyoun S. Kim, 2023-02-09 **Complex Problem Solving Beyond the Psychometric Approach** Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28

Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In a broad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by

using a particular type of CPS task e.g. minimal complex system tests which is a view taken by the psychometric community. The proposed approach taken here is that because CPS is multifaceted, multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other. Thus, this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities. The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS, DDM, and CDC. This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another, what learning conditions result in transferable knowledge and skills, and how these features can be trained.

Integrating an Awareness of Selfhood and Society into Virtual Learning Stricker, Andrew, Calongne, Cynthia, Truman, Barbara, Arenas, Fil, 2017-01-05. Recent technological advances have opened new platforms for learning and teaching. By utilizing virtual spaces, more educational opportunities are created for students who cannot attend a physical classroom environment. Integrating an Awareness of Selfhood and Society into Virtual Learning is a pivotal reference source that discusses the latest scholarly perspectives on creating meaningful learning and sensory engagement in virtual learning spaces and examines how selfhood is expressed in these environments. Highlighting emerging topics in education such as gender considerations, leadership development, and situated learning, this book is ideally designed for professionals, practitioners, graduate students, and academics interested in the role of virtual reality in learning contexts.
