Designing Assessment for Quality Learning Claire Wyatt-Smith, Valentina Klenowski, Peta Colbert, 2014-03-10 This book brings together internationally recognised scholars with an interest in how to use the power of assessment to improve student learning and to engage with accountability priorities at both national and global levels It includes distinguished writers who have worked together for some two decades to shift the assessment paradigm from a dominant focus on assessment as measurement towards assessment as central to efforts to improve learning These writers have worked with the teaching profession and in so doing have researched and generated key insights into different ways of understanding assessment and its relationship to learning The volume contributes to the theorising of assessment in contexts characterised by heightened accountability requirements and constant change The book s structure and content reflect already significant and growing international interest in assessment as contextualised practice as well as theories of learning and teaching that underpin and drive particular assessment approaches Learning theories and practices assessment literacies teachers responsibilities in assessment the role of leadership and assessment futures are the organisers

within the book's structure and content. The contributors to this book have in common the view that quality assessment and quality learning and teaching are integrally related. Another shared view is that the alignment of assessment with curriculum teaching and learning is linchpin to efforts to improve both learning opportunities and outcomes for all. Essentially the book presents new perspectives on the enabling power of assessment. In so doing the writers recognise that validity and reliability the traditional canons of assessment remain foundational and therefore necessary. However they are not of themselves sufficient for quality education. The book argues that assessment needs to be radically reconsidered in the context of unprecedented societal change. Increasingly communities are segregating more by wealth with clear signs of social, political, economic and environmental instability. These changes raise important issues relating to ethics and equity taken to be core dimensions in enabling the power of assessment to contribute to quality learning for all. This book offers readers new knowledge about how assessment can be used to re-engage learners across all phases of education. **Adult and**

Continuing Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-03-31. Beyond the undergraduate and graduate levels education has traditionally ceased when students enter the workforce as professionals in their respective fields. However recent trends in education have found that adult students beyond the traditional university age often benefit greatly from returning to further their education. *Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications* investigates some of the most promising trends in furthering education and professional development in a variety of settings and industries. With an extensive array of chapters on topics ranging from non-traditional students to online and distance education for adult learners, this multi-volume reference book will provide students, educators and industry professionals with the tools necessary to make the most of their return to the classroom. **Demythologizing Educational Reforms** Arthur T. Costigan, Leslee Grey, 2014-08-21. There are dozens of

myths surrounding educational reform today: maintaining the school's role in economic competitiveness, the deficiency of teachers, the benefits of increased testing and the worthiness of privatization. In this volume the editors argue that this discussion has been co-opted to reflect the values and worldviews of special interest groups such as elites in power, politicians, corporate educational foundations and the media. Prominent educational writers tackle contemporary issues such as neoliberalism, suburban schooling, charter schools and parental involvement. They expose the logic behind the talk and critically examine these problematic beliefs to uncover meaningful improvements in education which are better grounded in the social, economic, political and educational realities of contemporary society.
